How do you feel about this story?

Preparing your data

Verifying data integrity

Scoping your
exploration

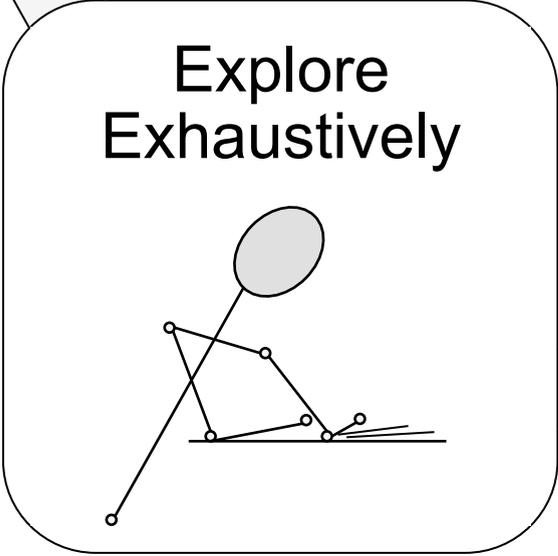

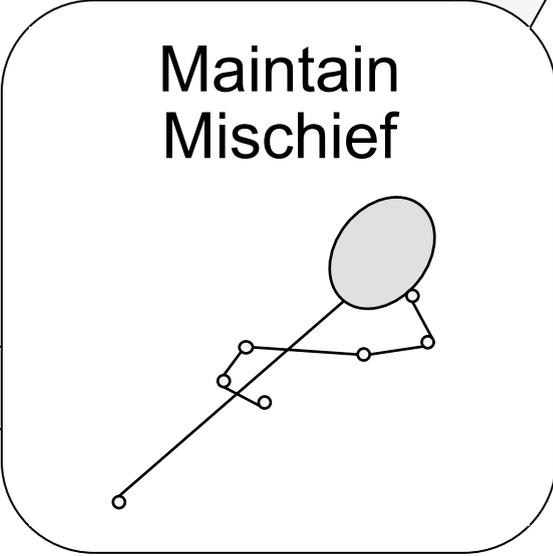

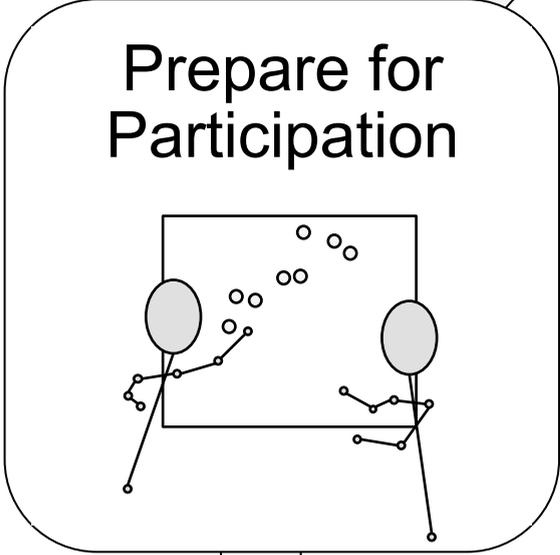

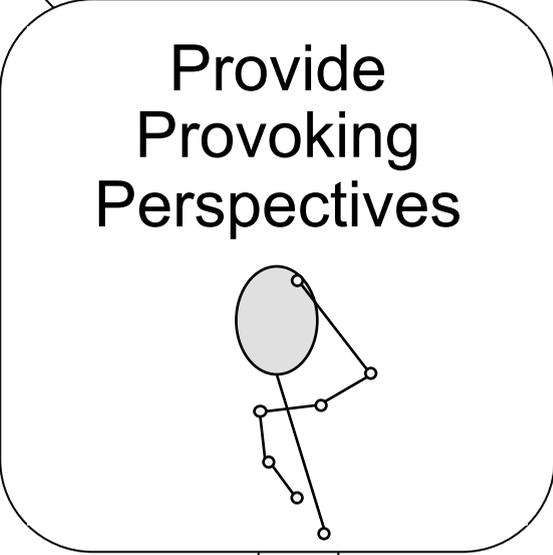

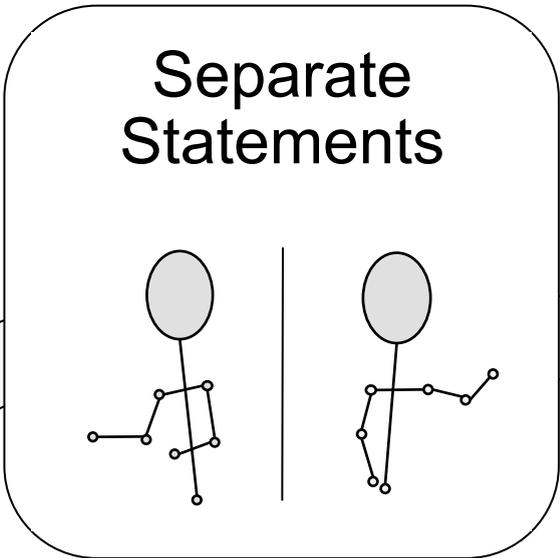

Producing
results

Accumulating
observations

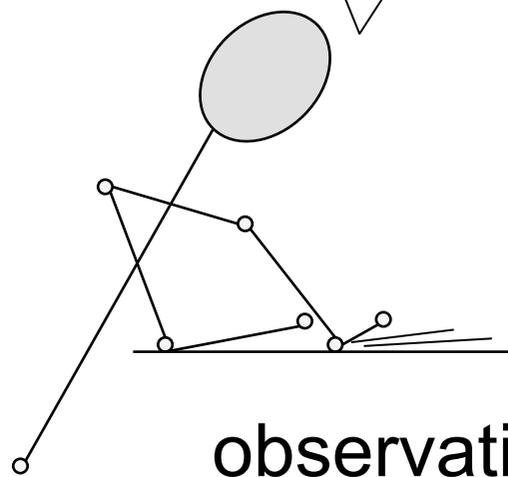

Interpreting
and
exploring
observations

Clustering interpretations

Preparing
your report

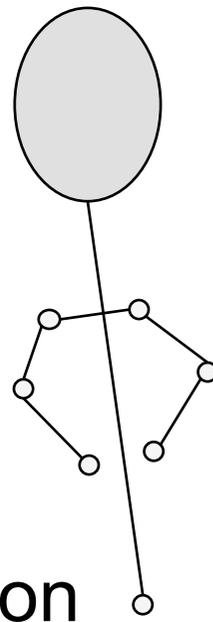

10% of stories were rated as sad. 70% were marked as happy.

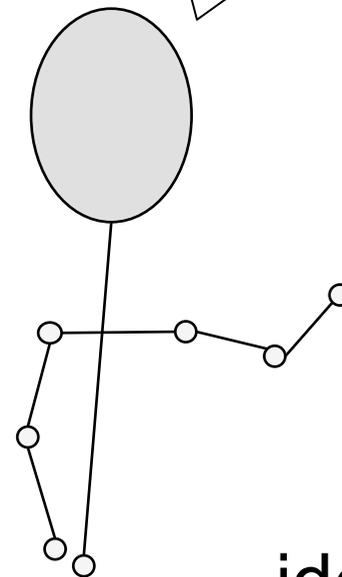

observation

This COULD mean that people felt unable to talk about negative experiences.

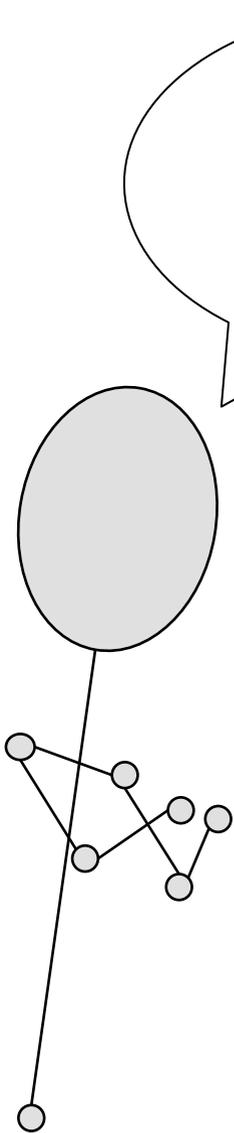

interpretation

We could set up an anonymous hotline for complaints.

idea

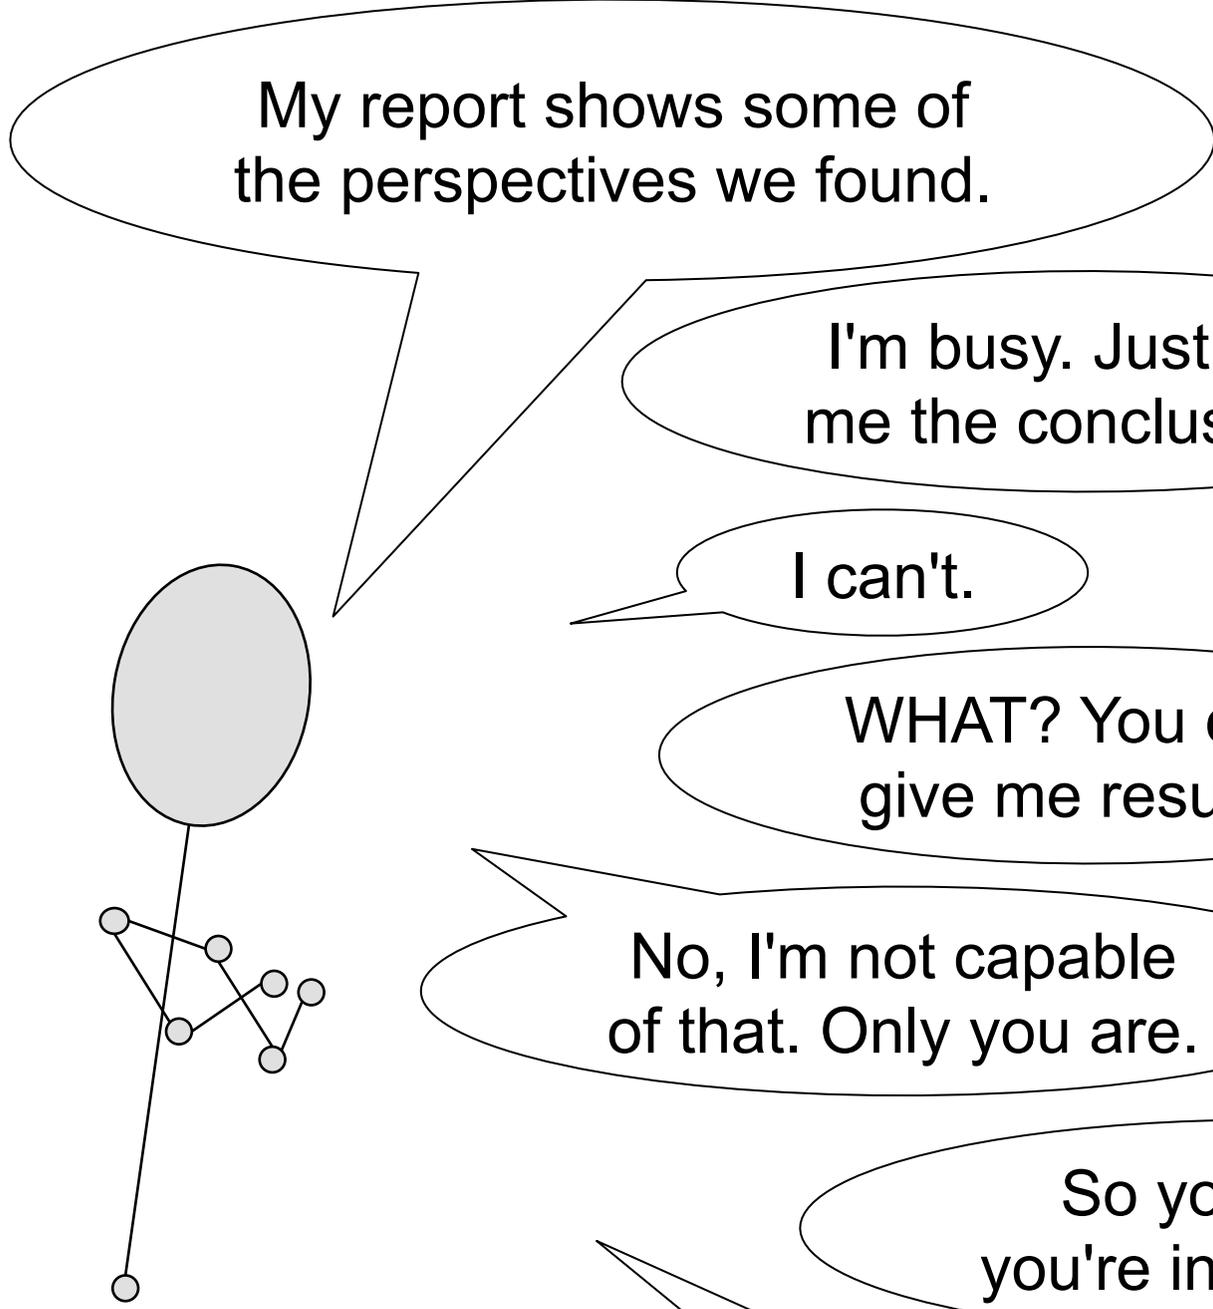

This could represent a taboo.

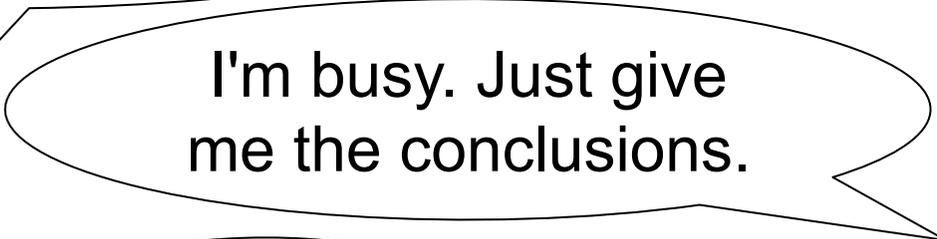

Or people might not have wanted to offend their peers...

Or the question might have implied a reluctance...

Or maybe people didn't trust us...

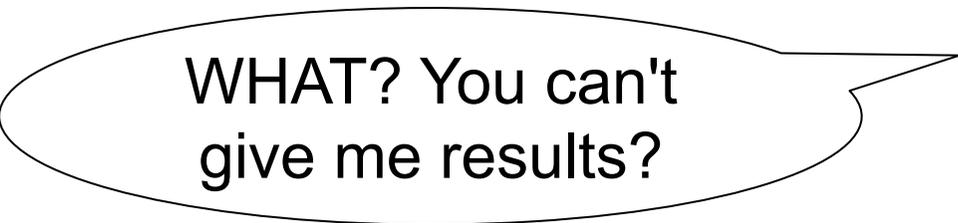

My report shows some of
the perspectives we found.

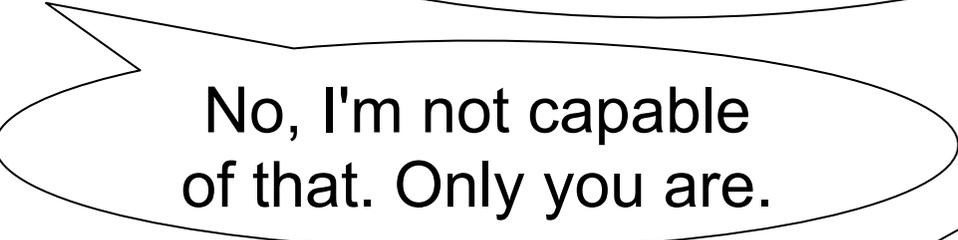

I'm busy. Just give
me the conclusions.

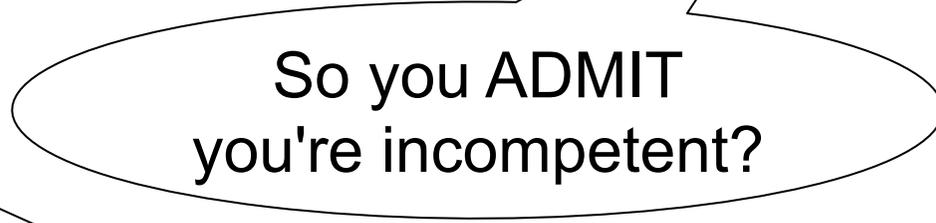

I can't.

WHAT? You can't
give me results?

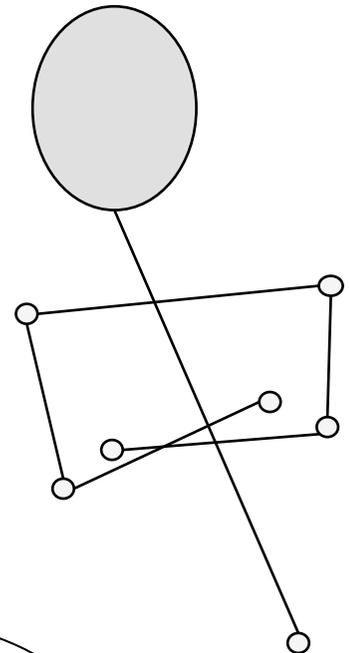

No, I'm not capable
of that. Only you are.

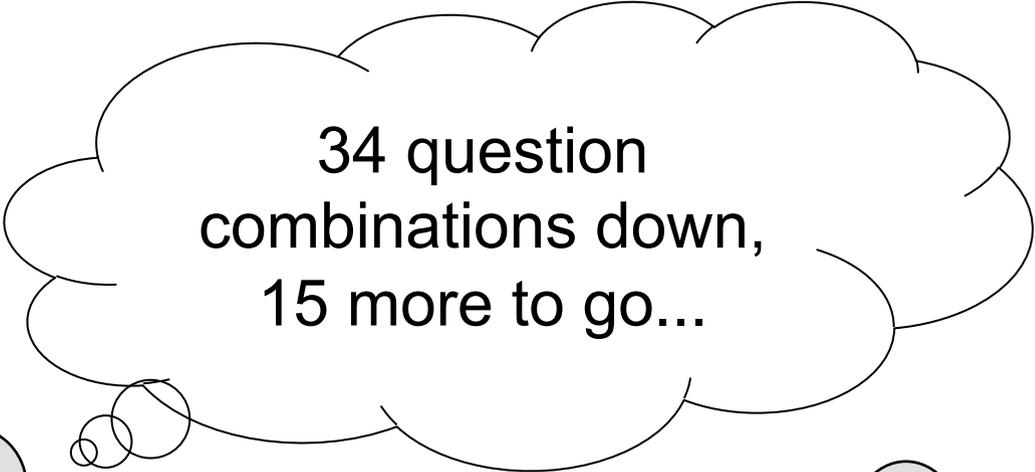

So you ADMIT
you're incompetent?

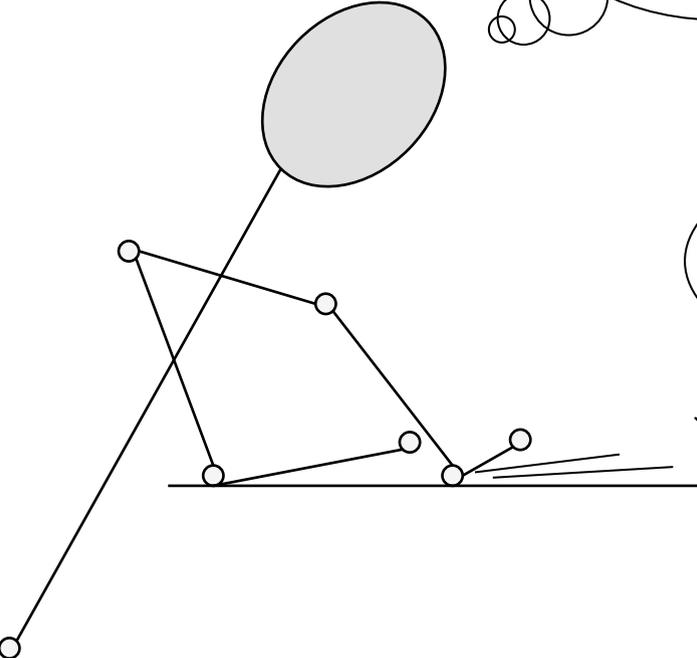

Maybe.

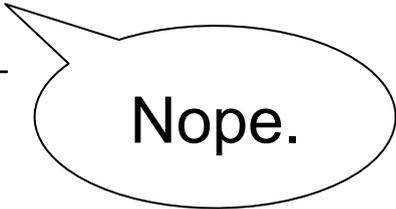

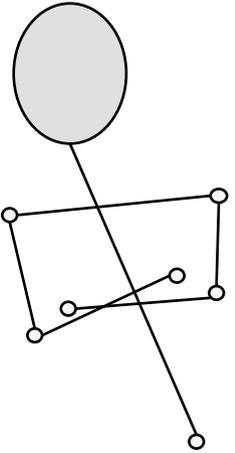

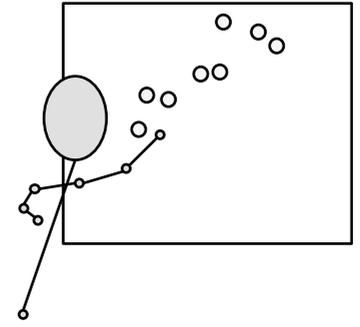

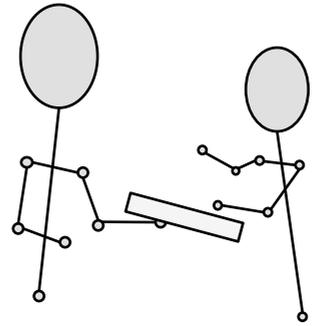

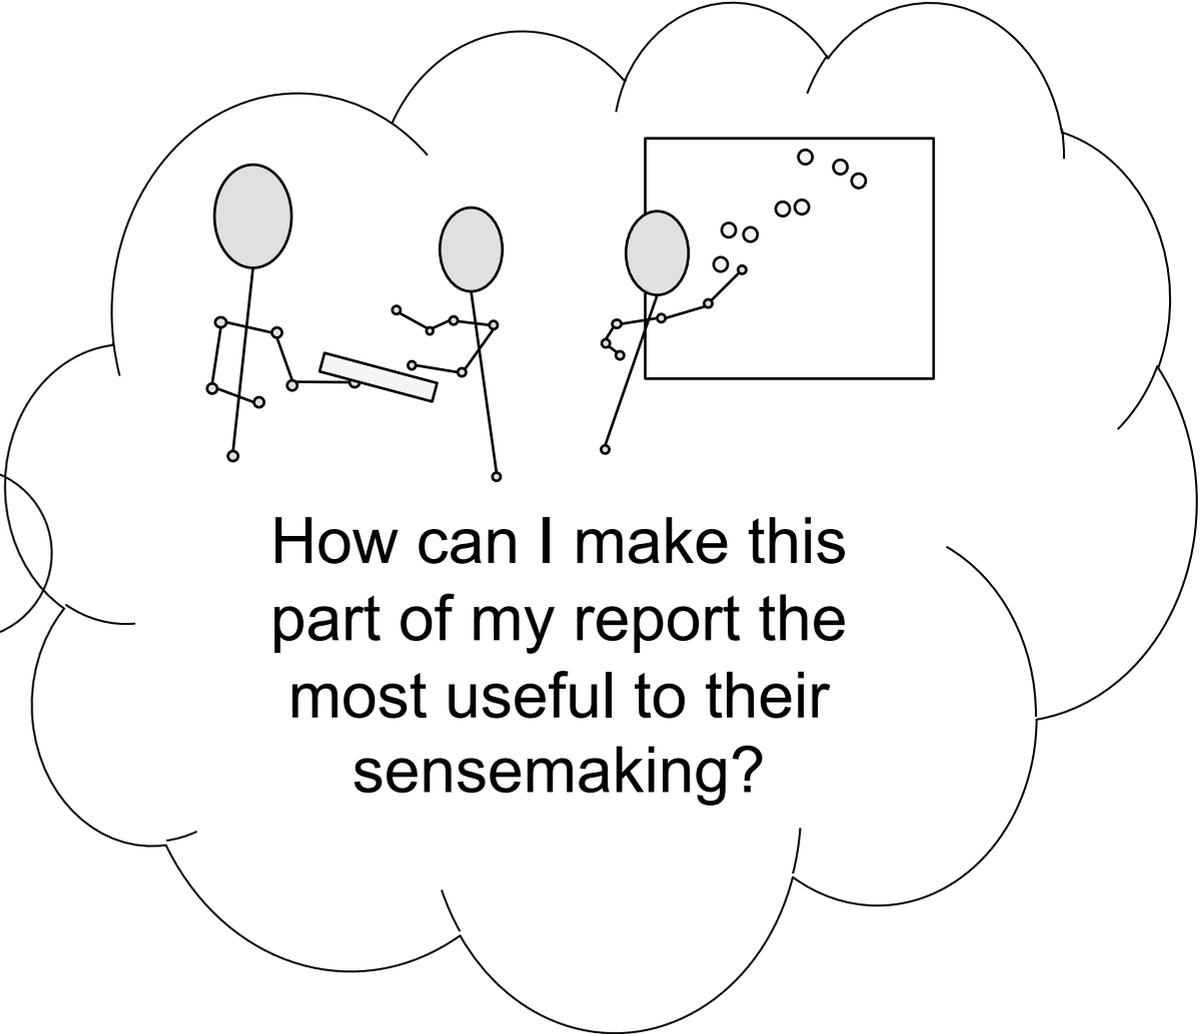

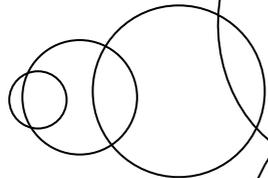

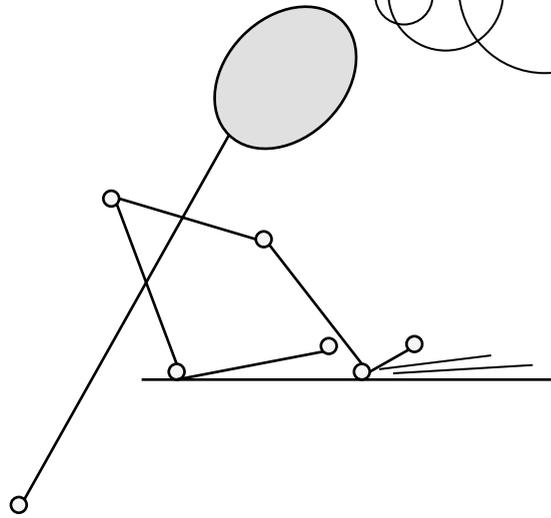

34 question
combinations down,
15 more to go...

Are you
done yet?

Nope.

**How can I make this
part of my report the
most useful to their
sensemaking?**

Unremarkable.

NEWS
People who told stories about failure rated them more negatively.

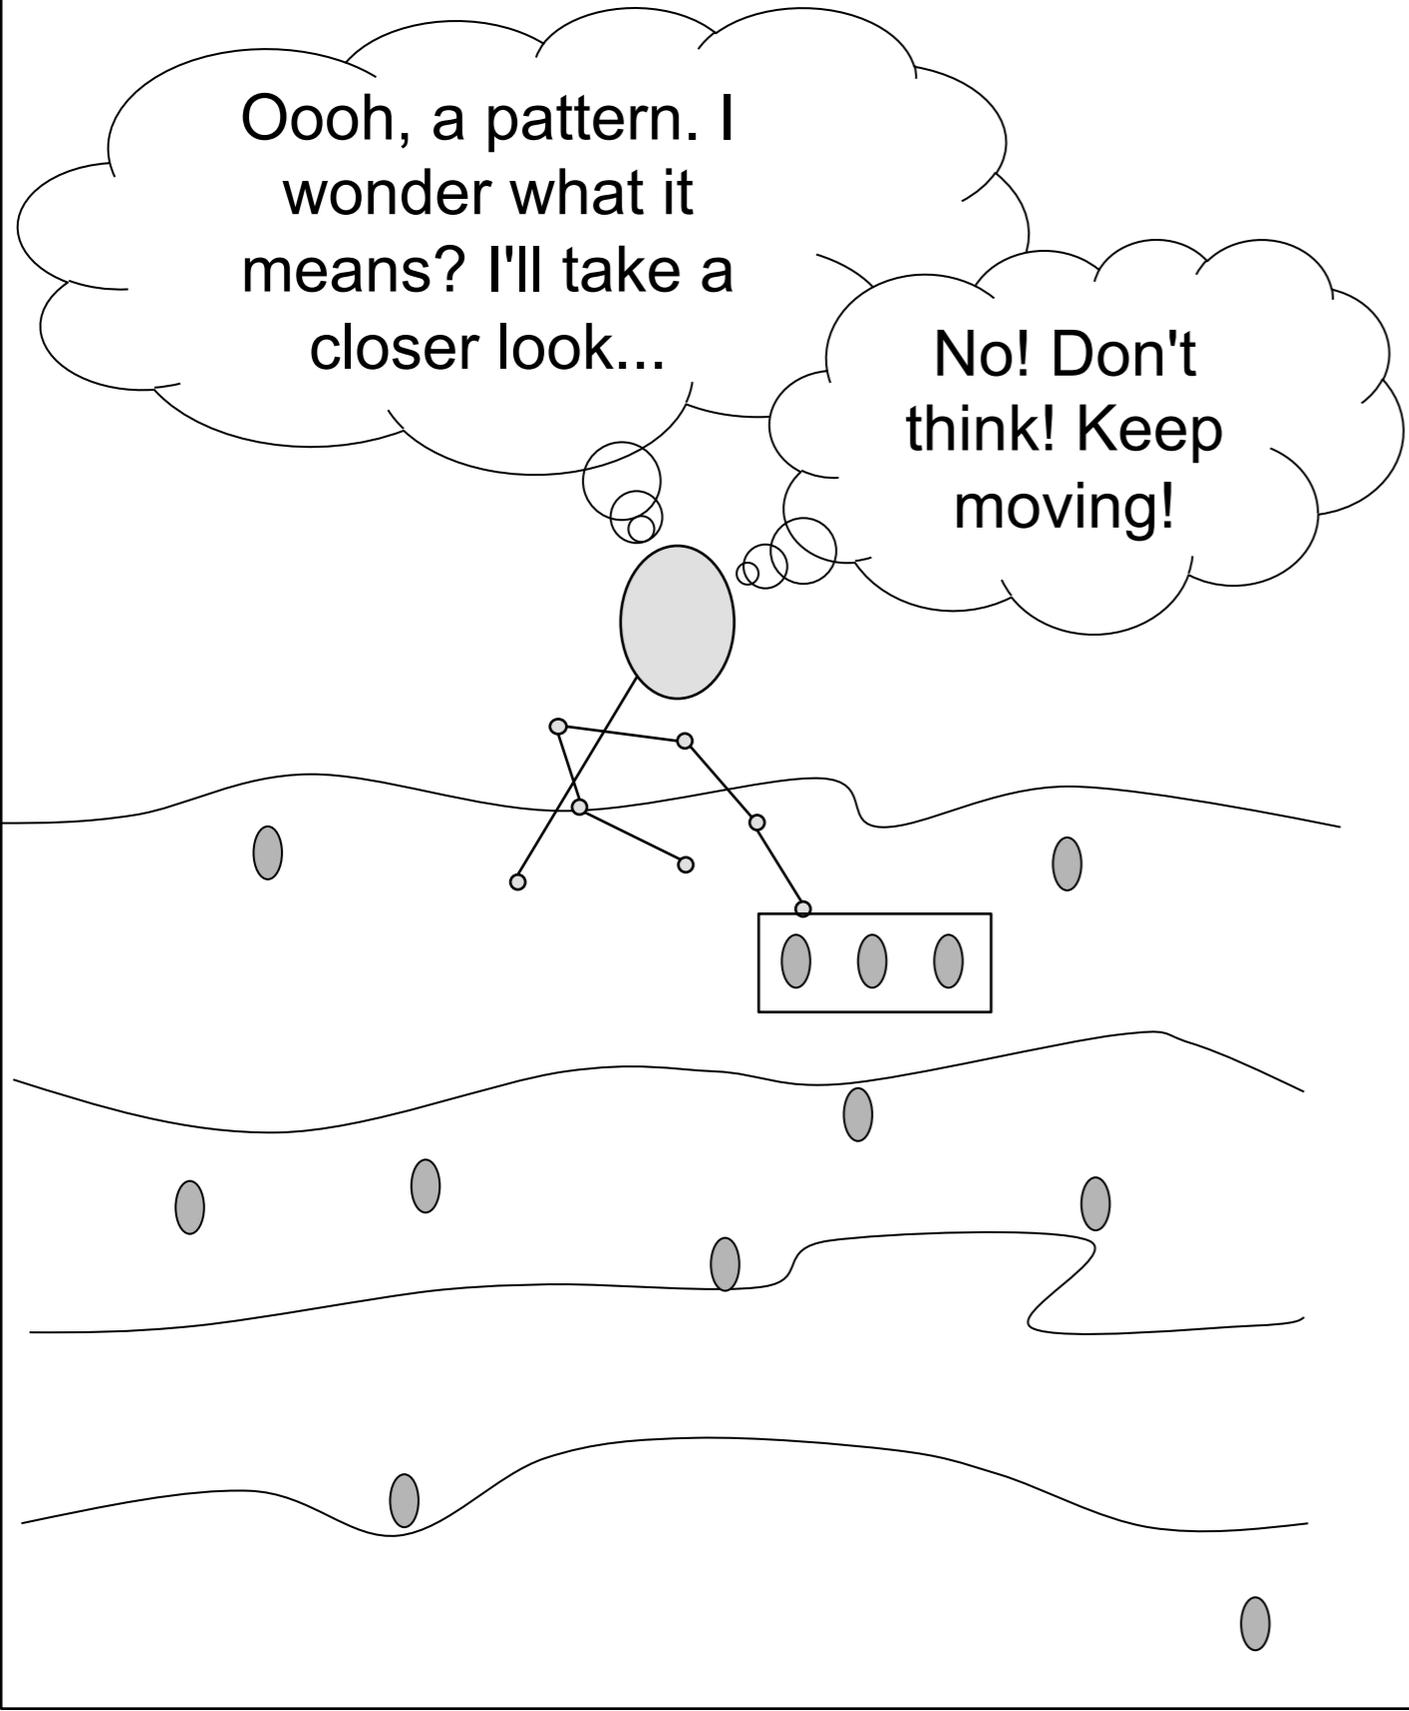

Now THAT's worth remarking on.

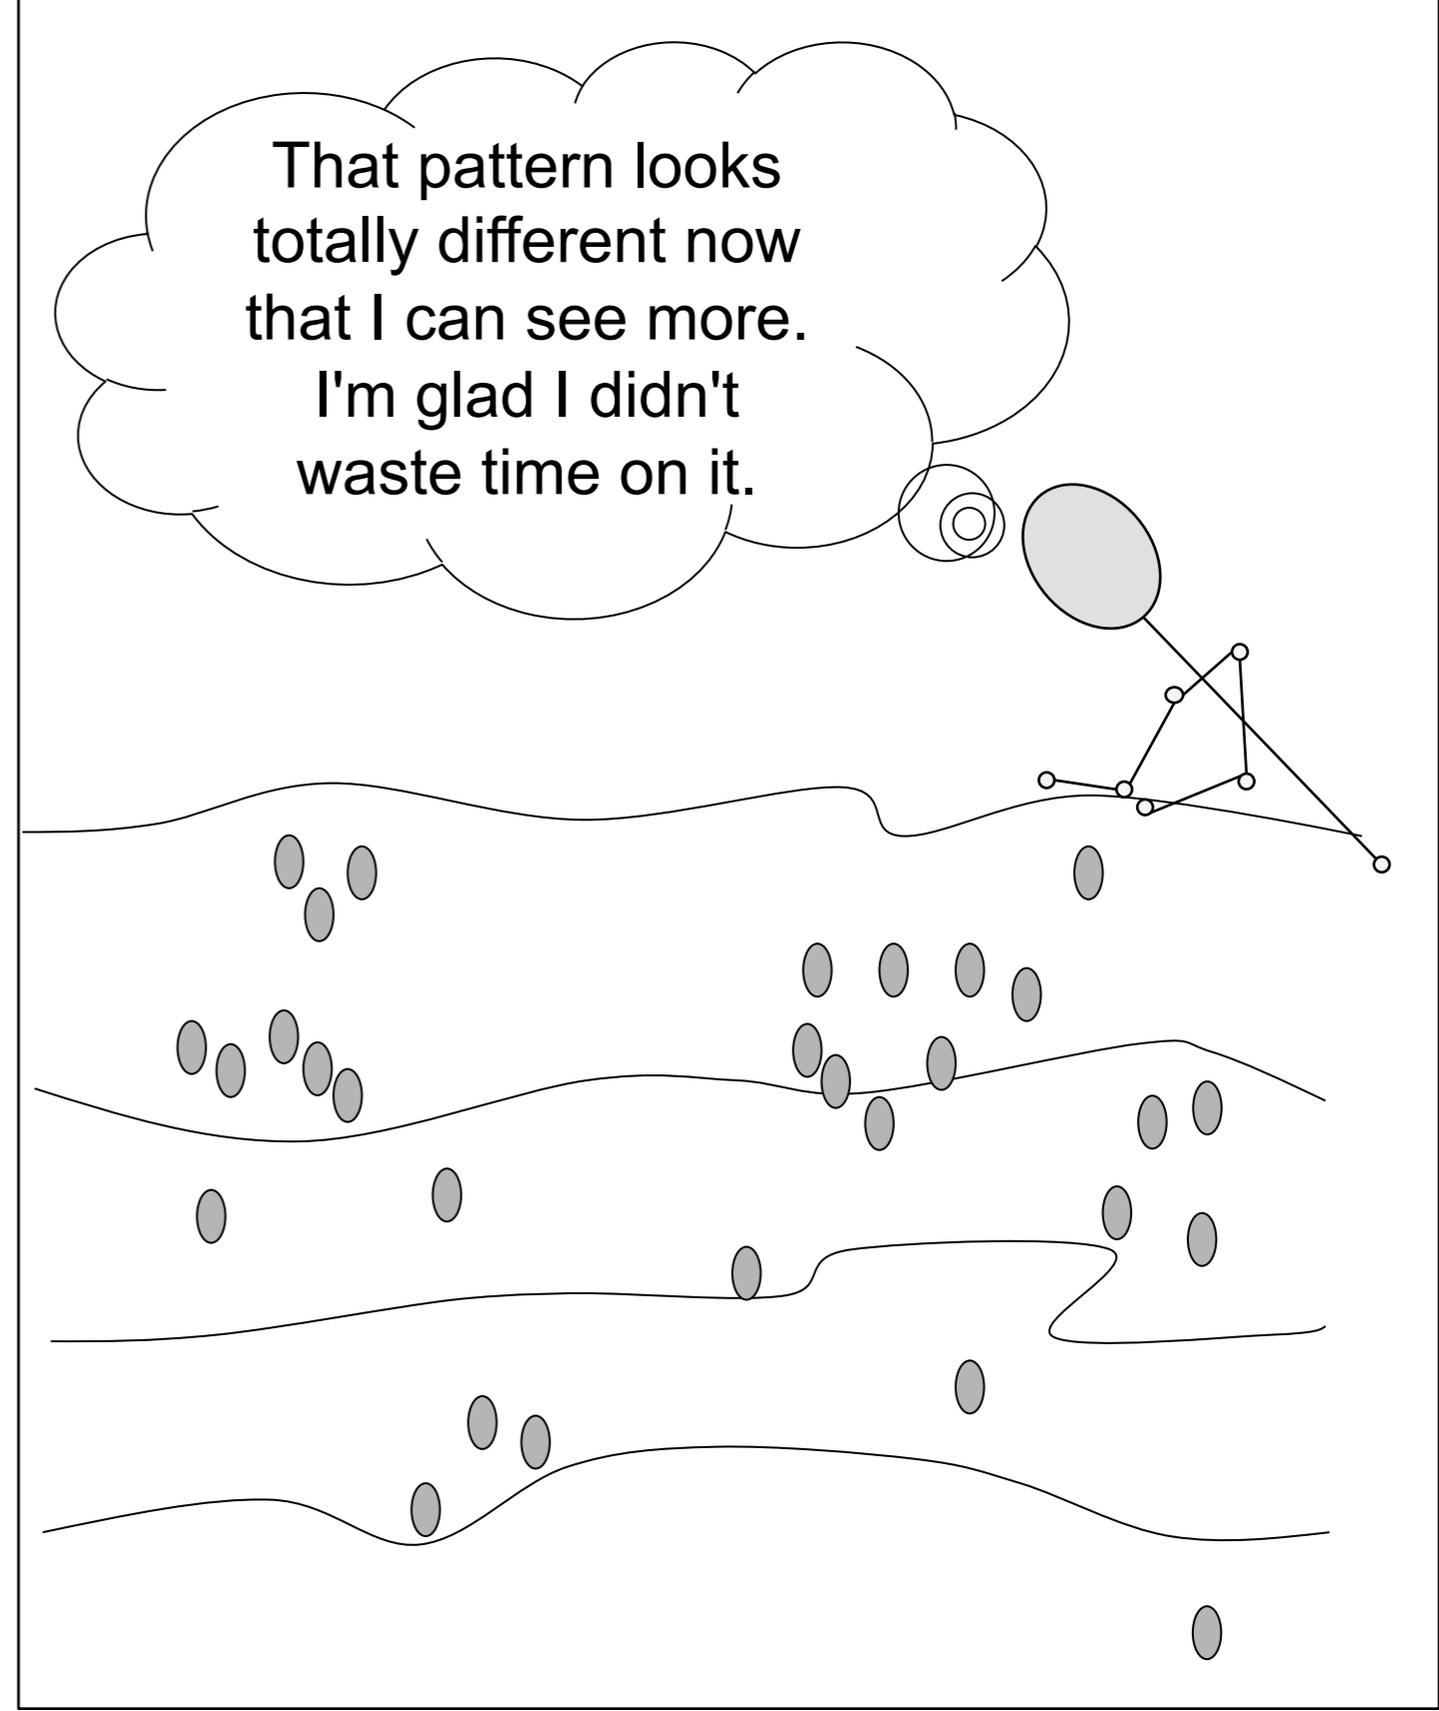

NEWS
Non-English speakers rated their stories more negatively.

Oooh, a pattern. I wonder what it means? I'll take a closer look...

No! Don't think! Keep moving!

That pattern looks totally different now that I can see more. I'm glad I didn't waste time on it.

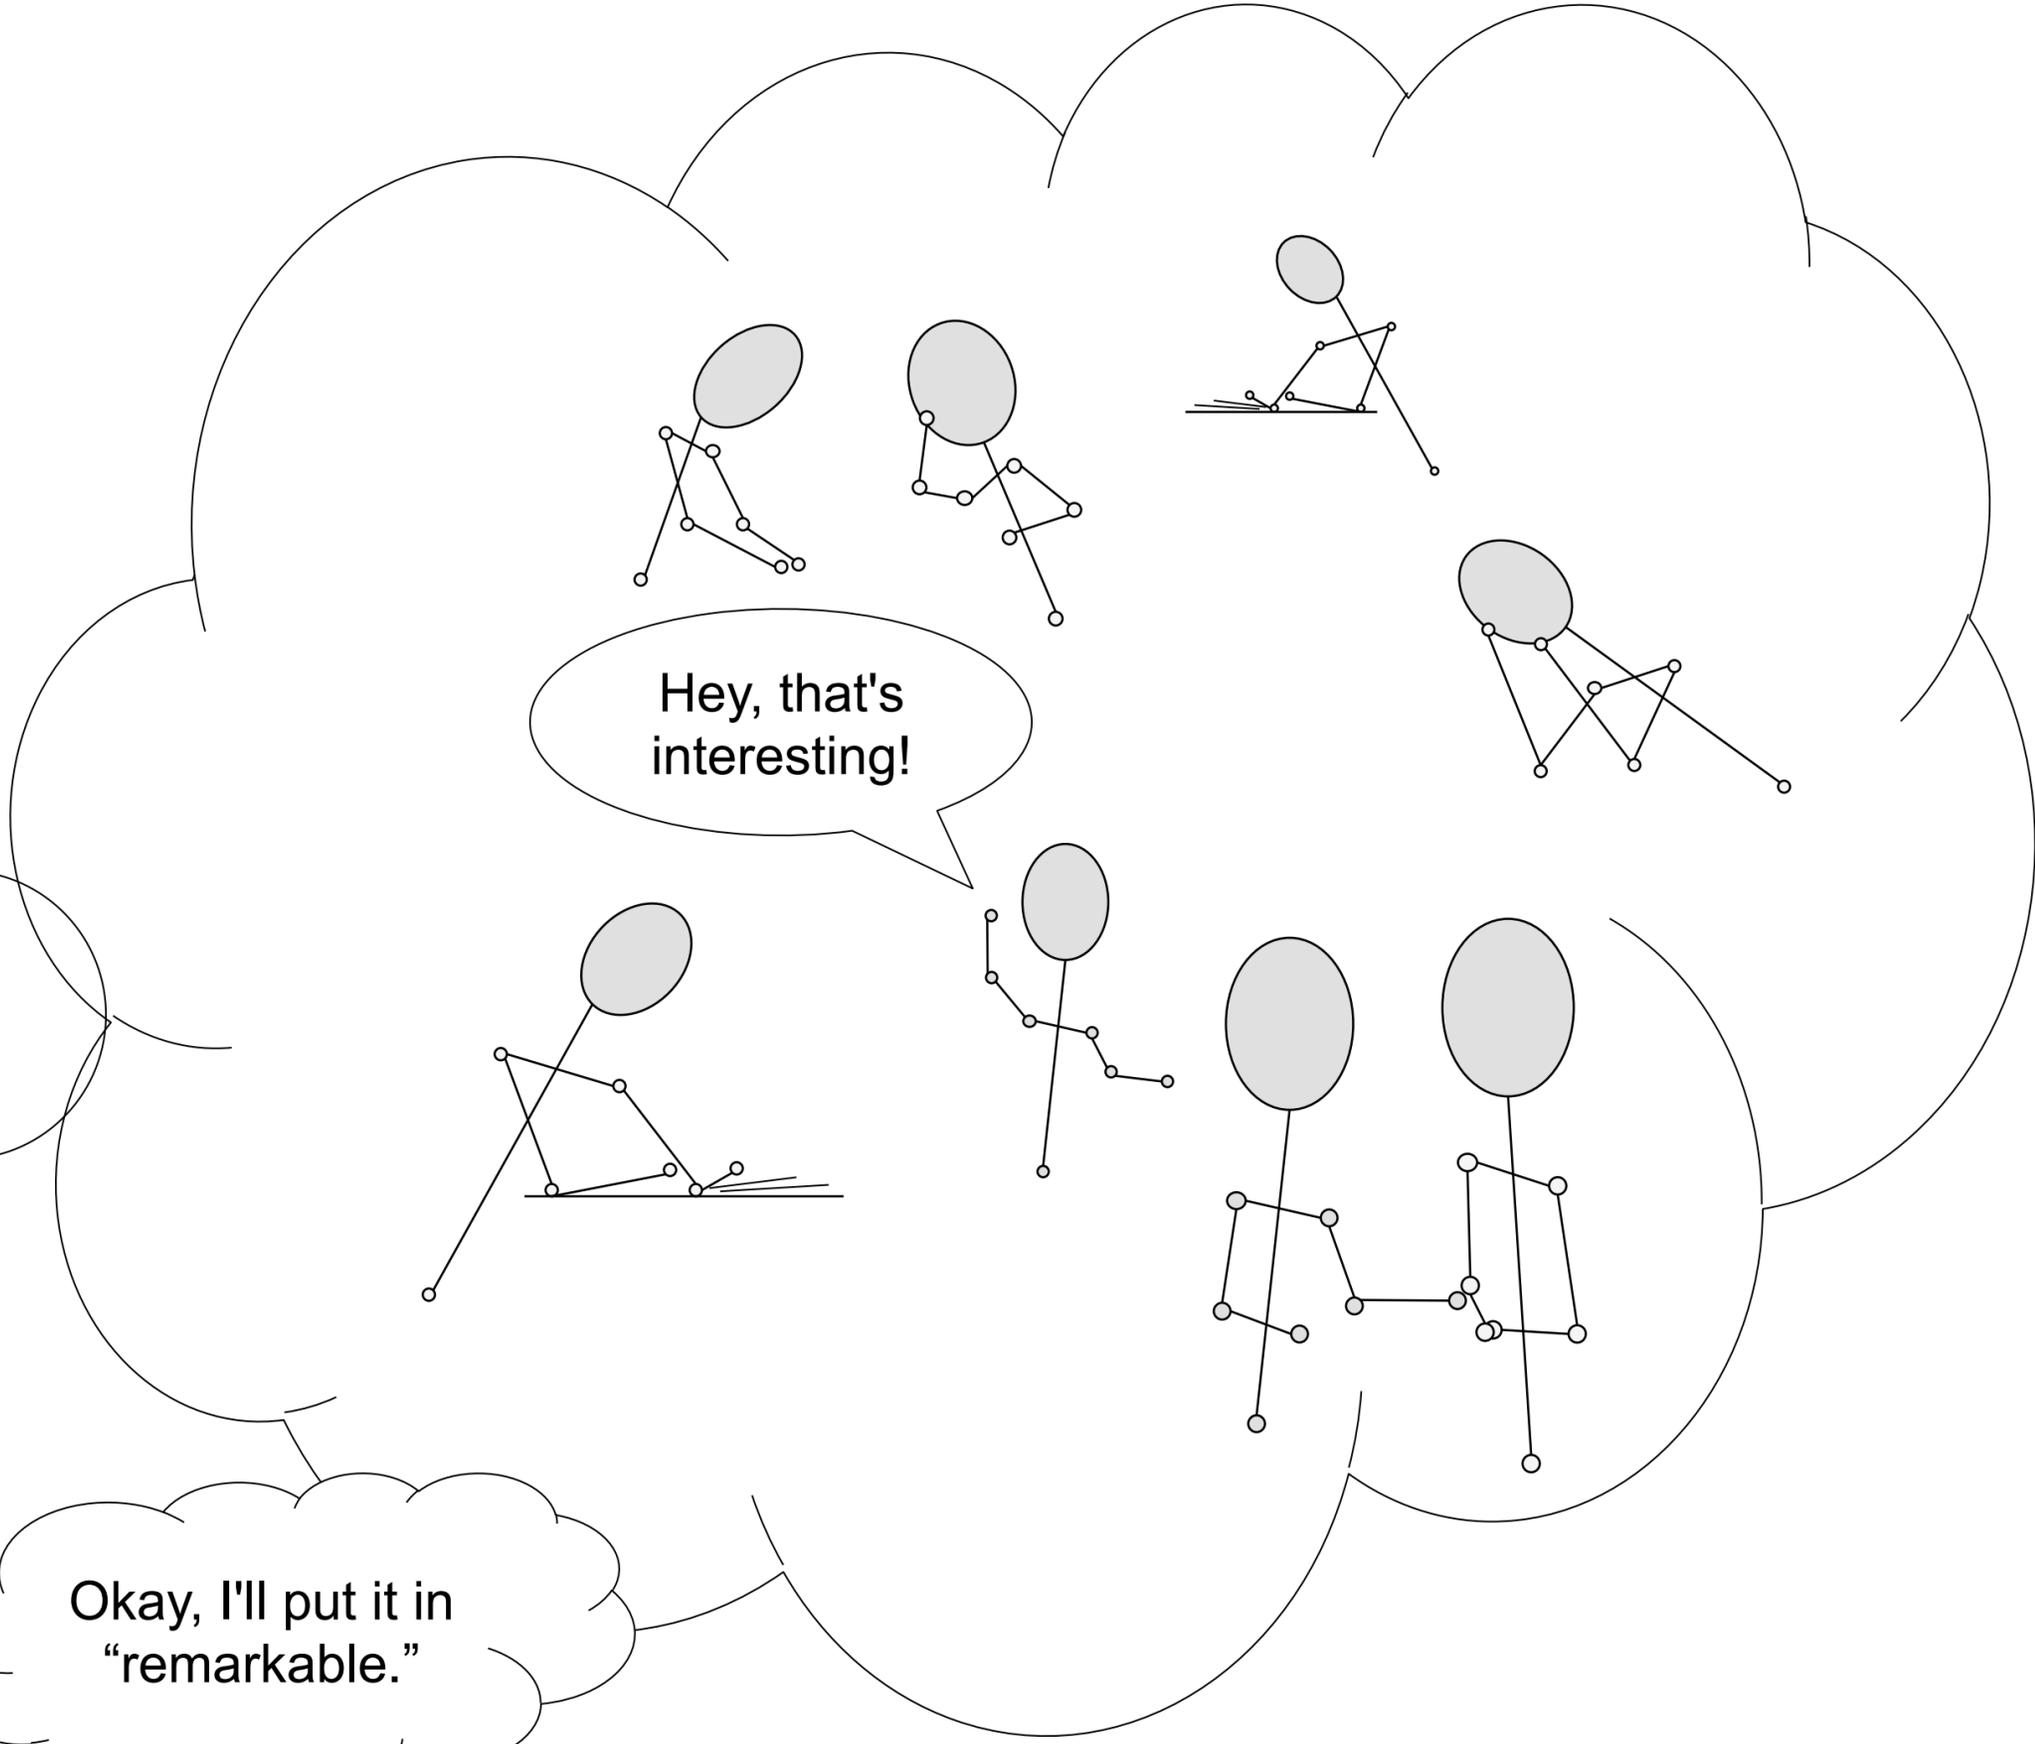

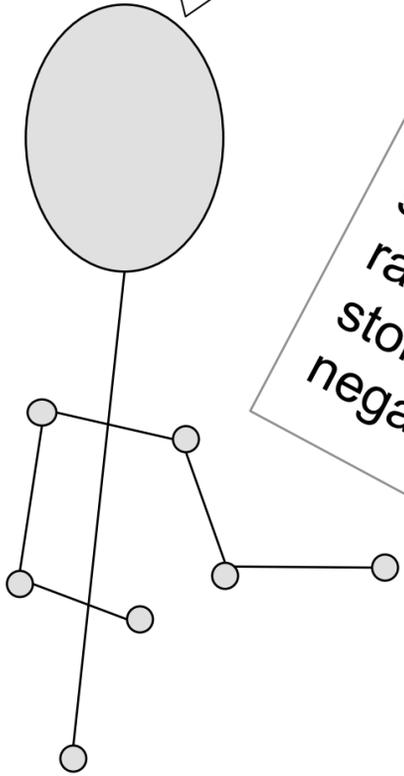

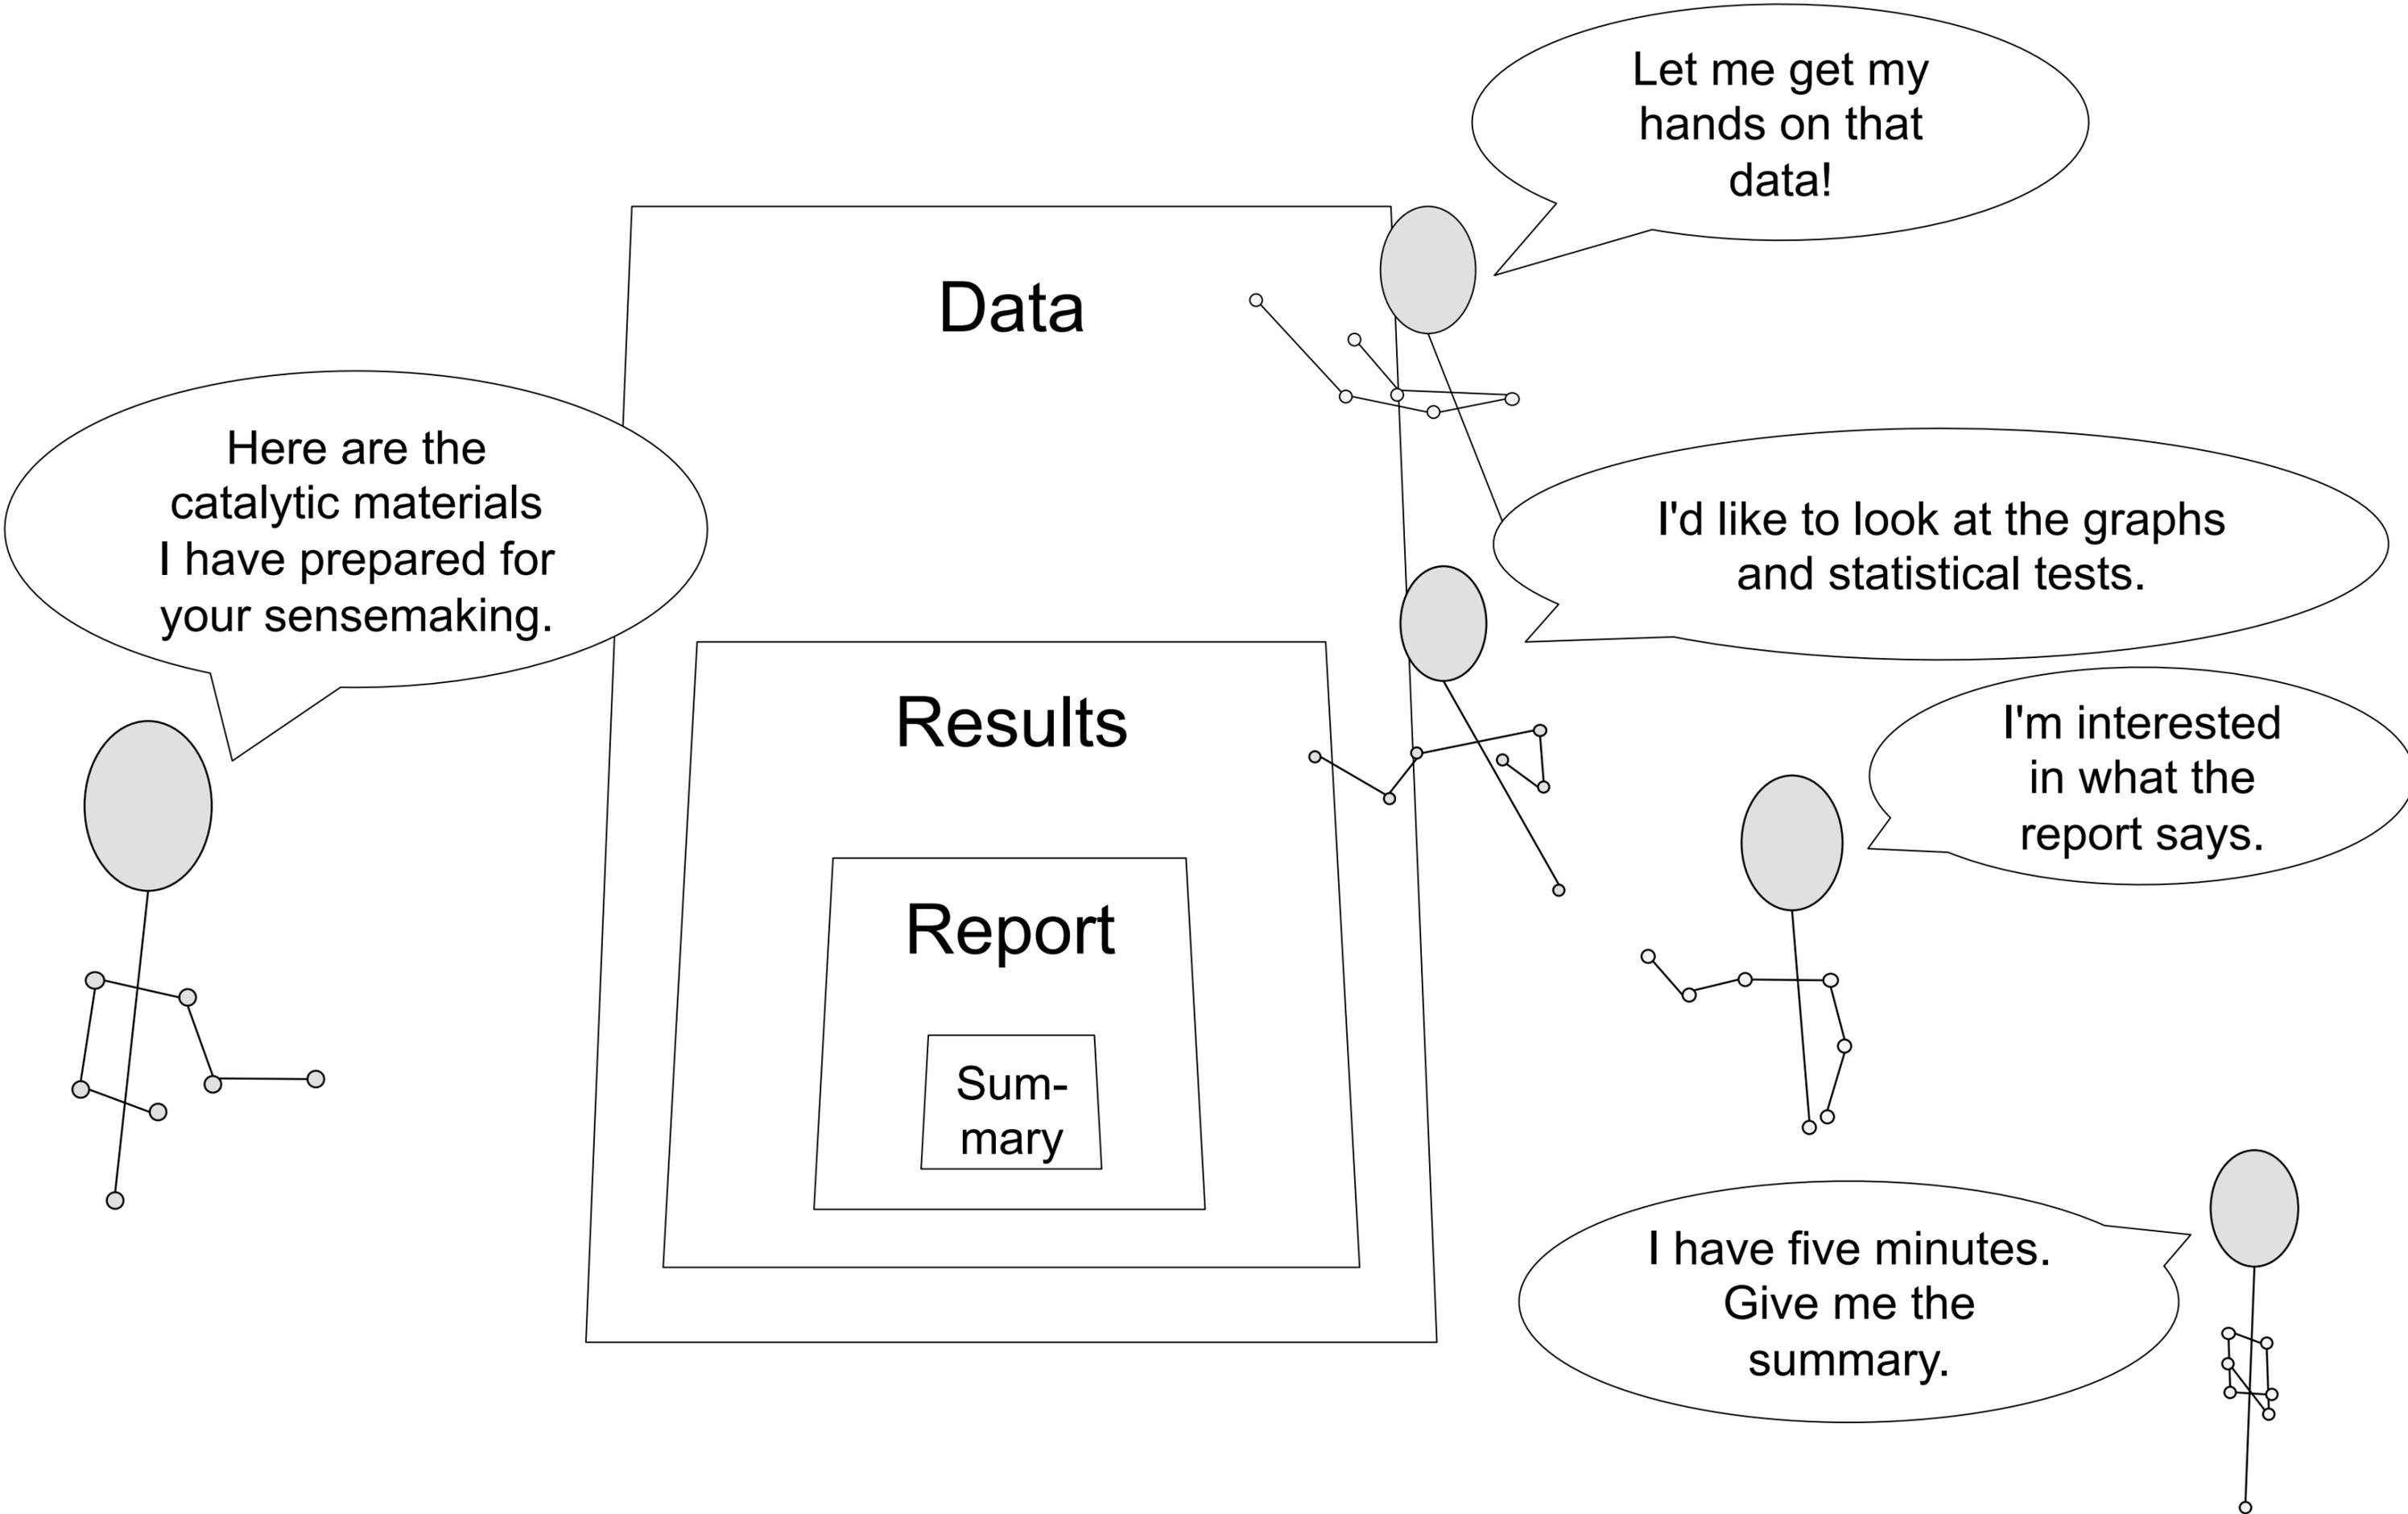

Non-English speakers rated their stories more negatively.

NEWS
Non-English speakers rated their stories more negatively.

Okay, I'll put it in "remarkable."

Hey, that's interesting!

Data

Results

Report

Sum-
mary

Let me get my hands on that data!

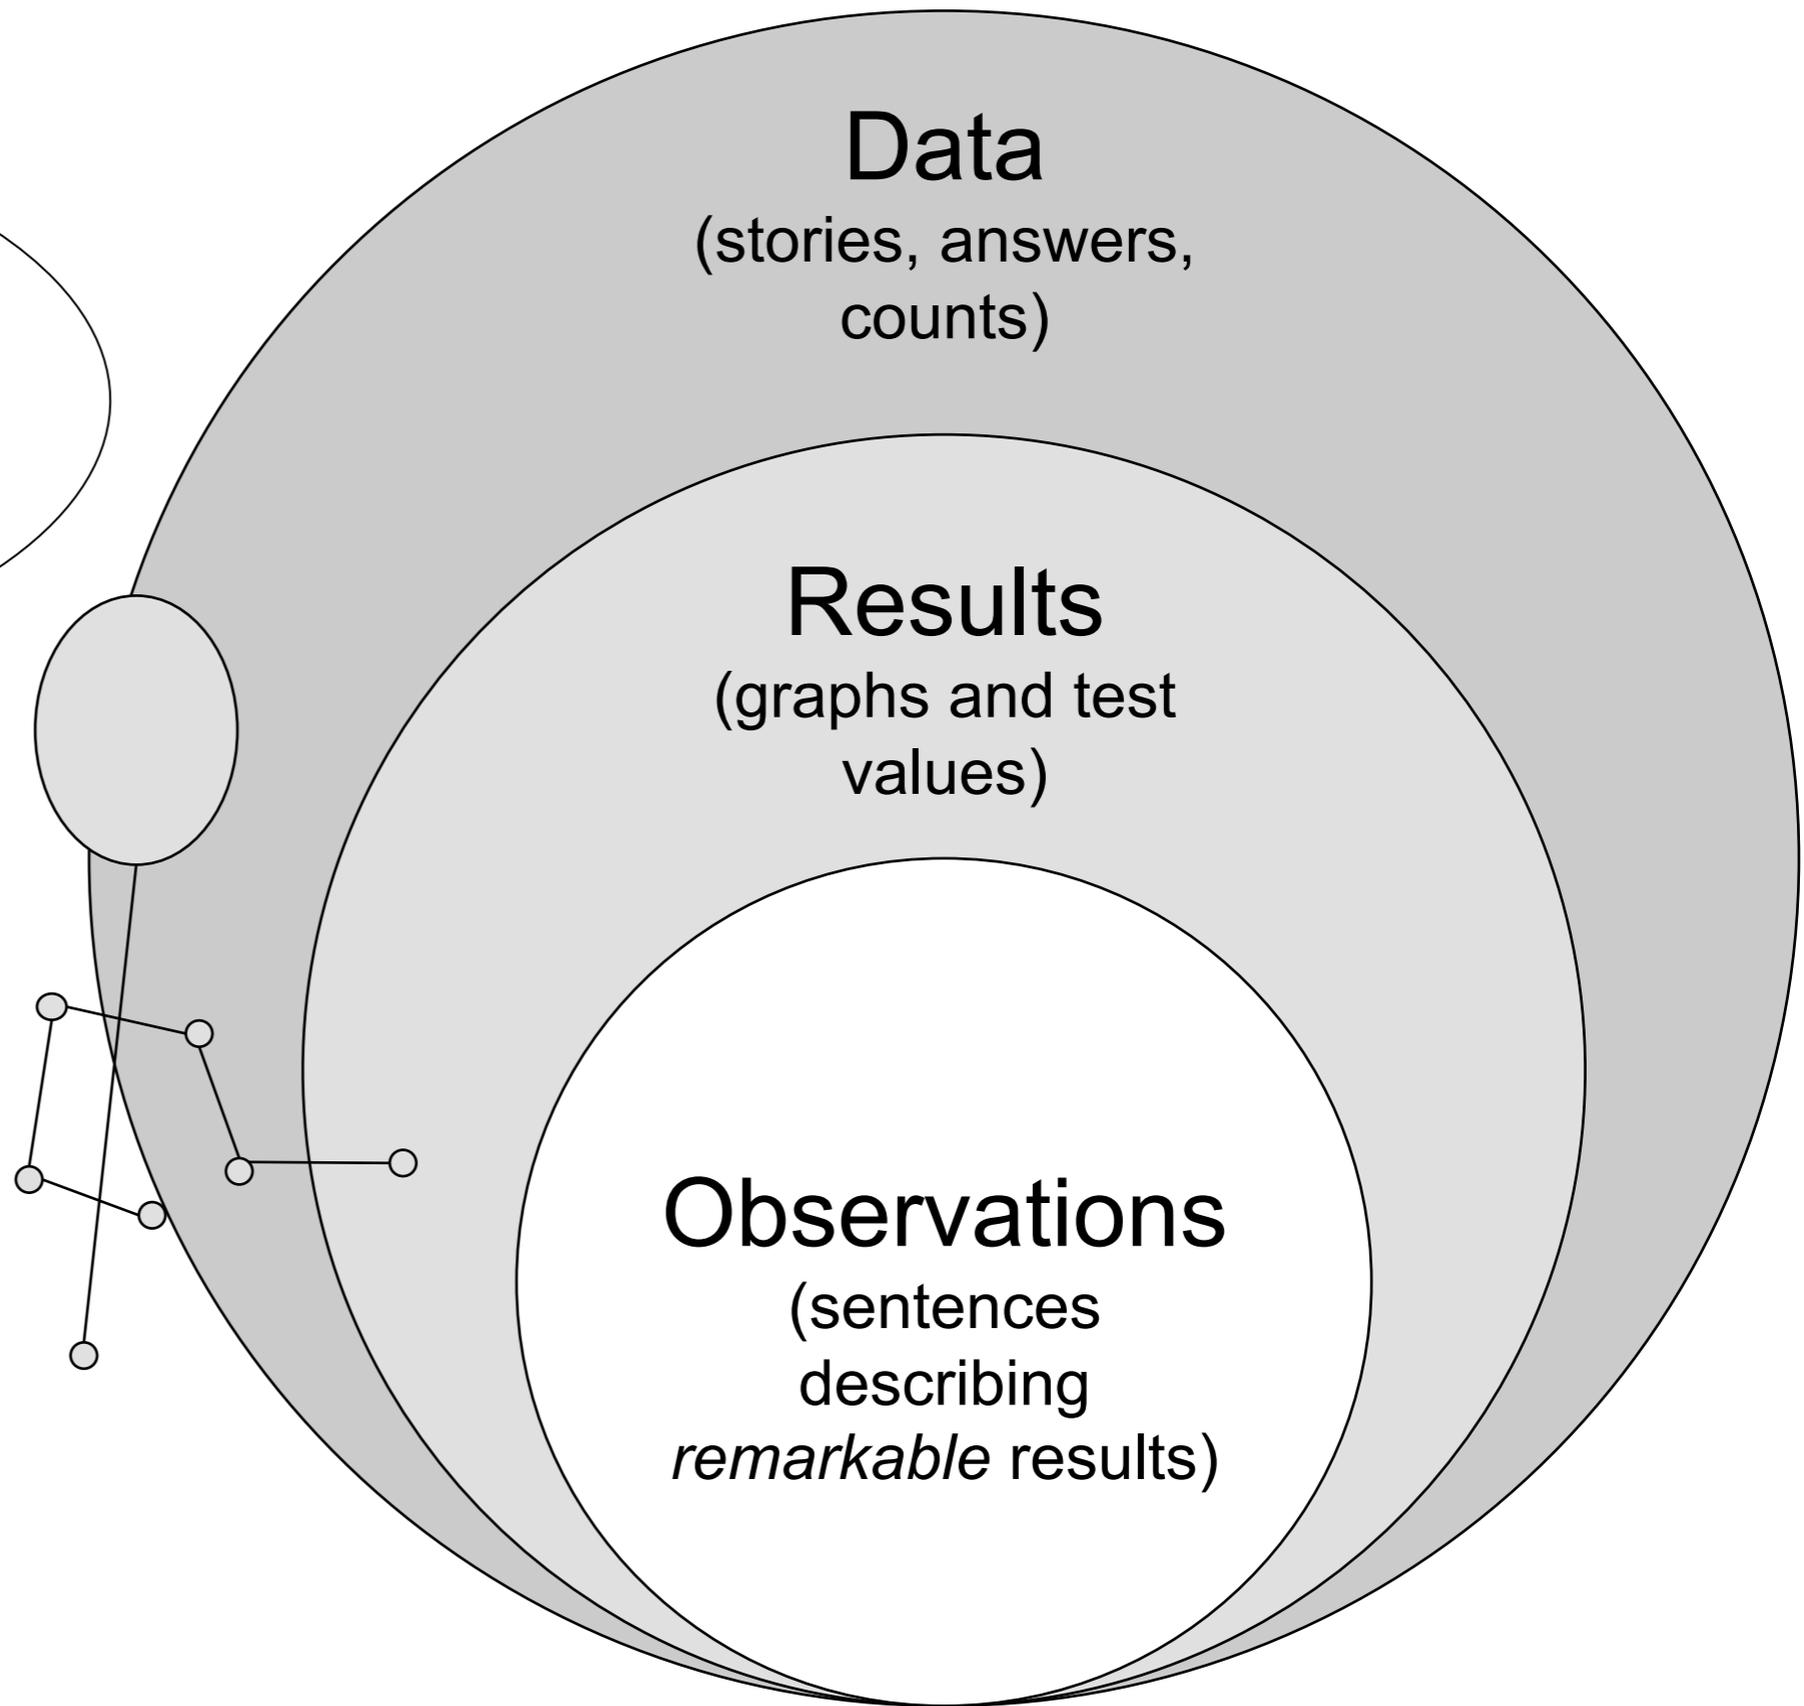

I'd like to look at the graphs and statistical tests.

I'm interested in what the report says.

I have five minutes. Give me the summary.

Here are the catalytic materials I have prepared for your sensemaking.

Now that I'm done accumulating observations, I will put away the data and results. I'll get them out again if I need them.

Data

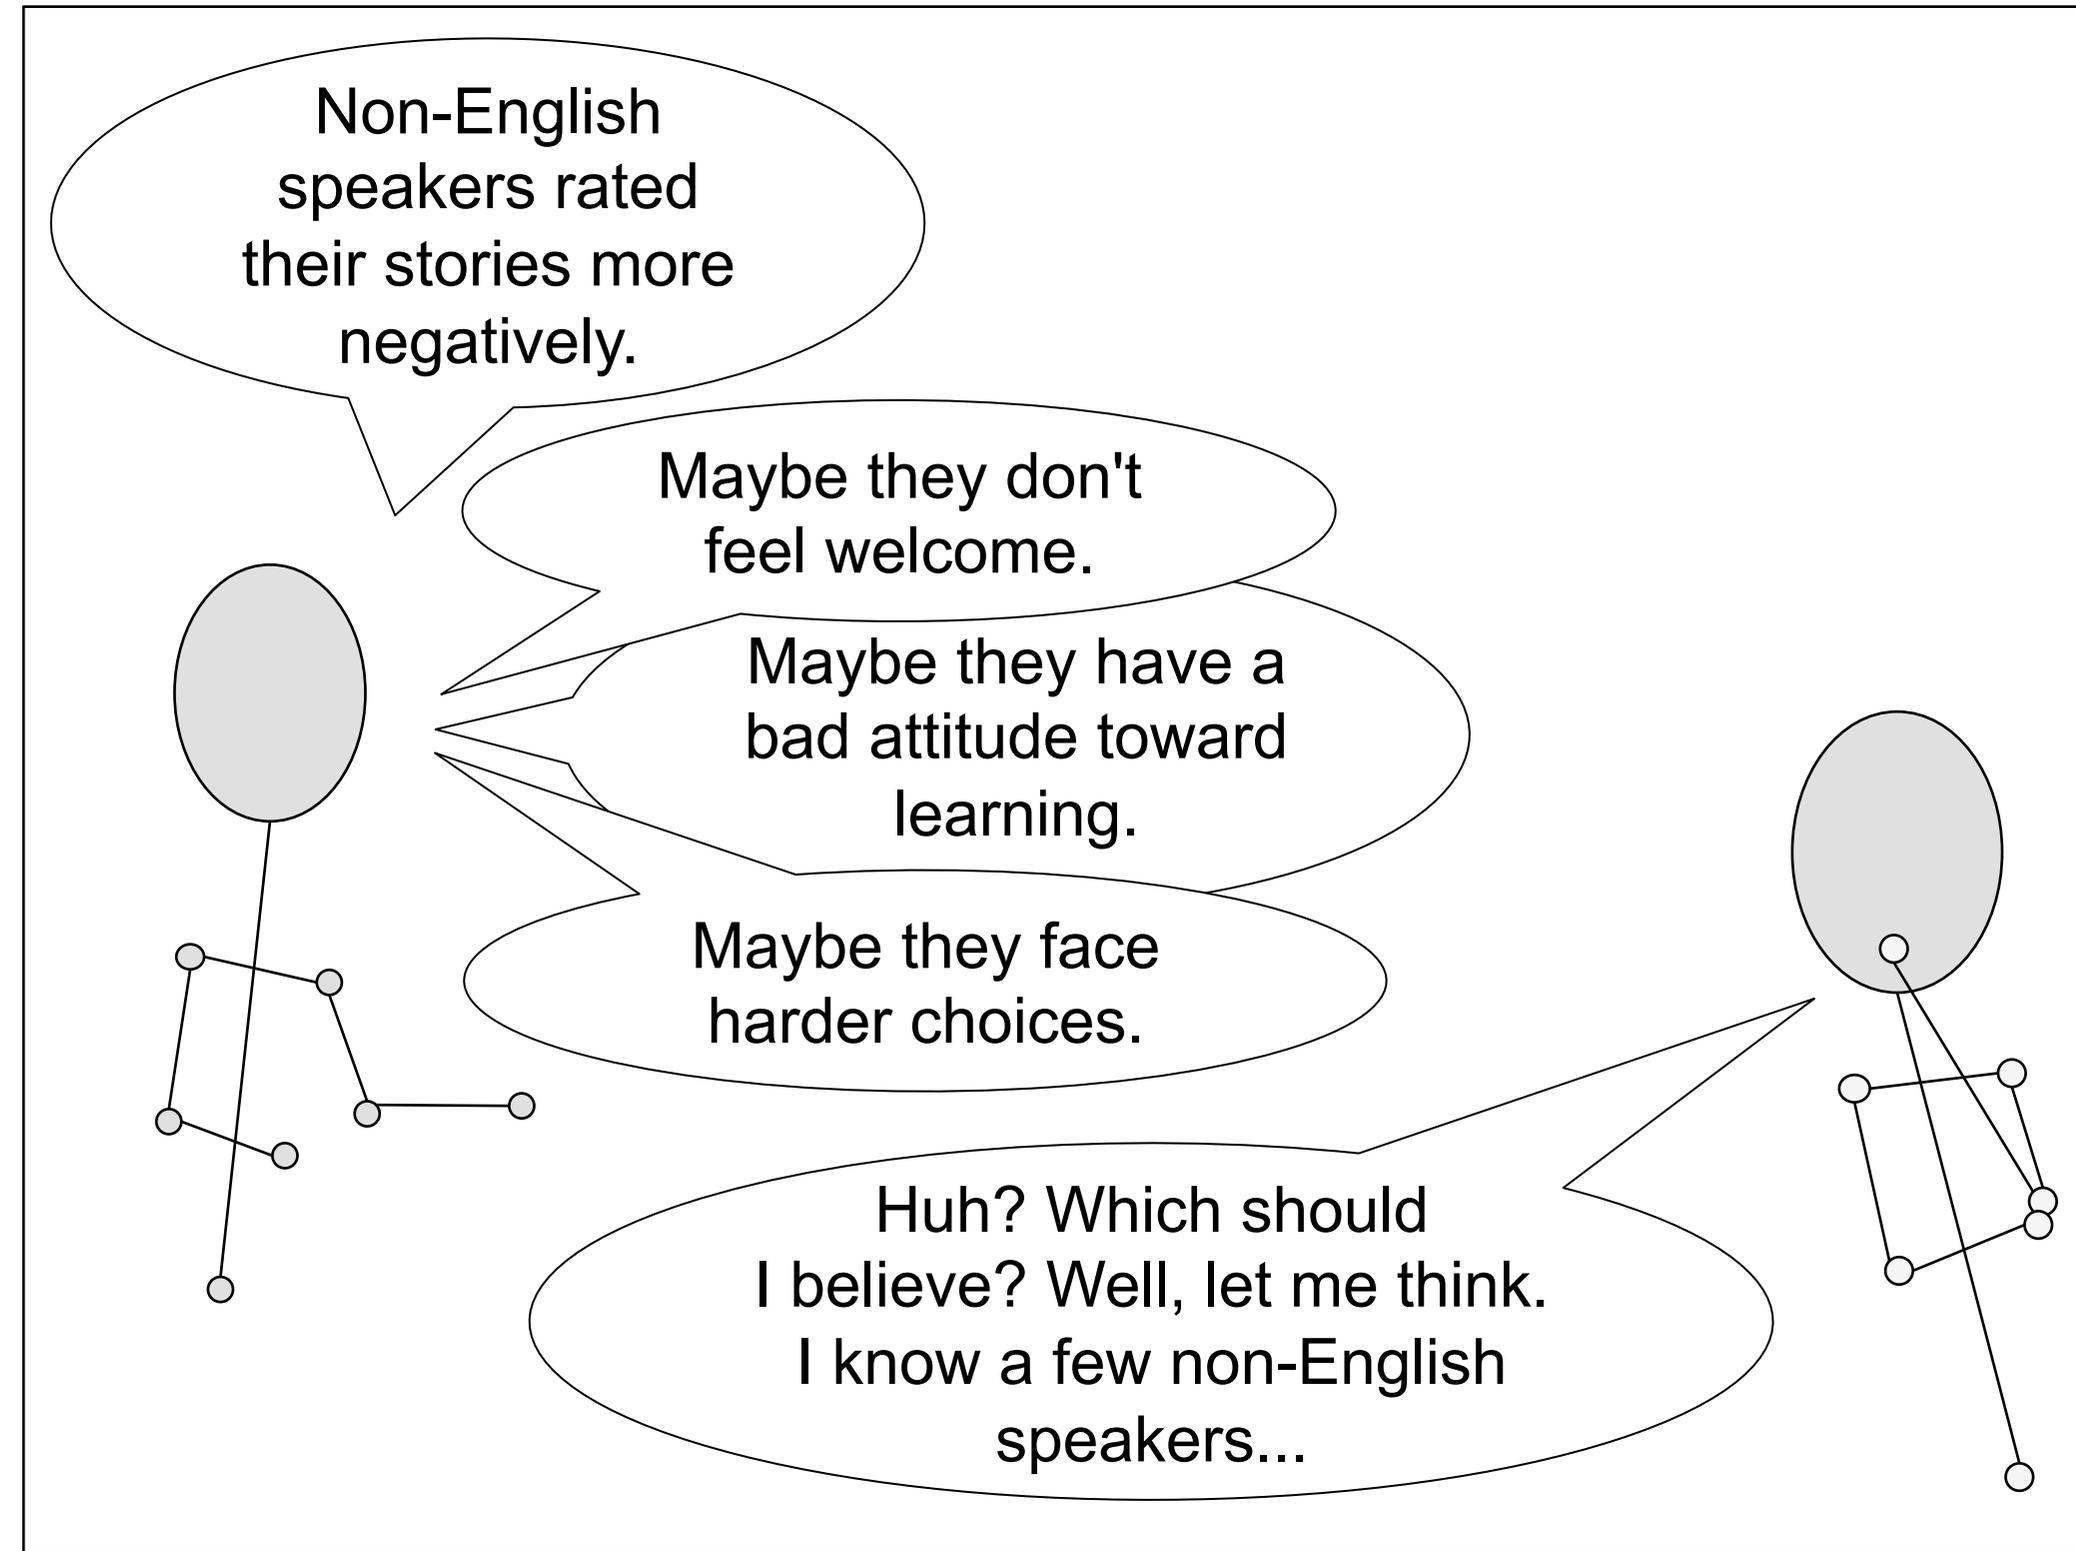

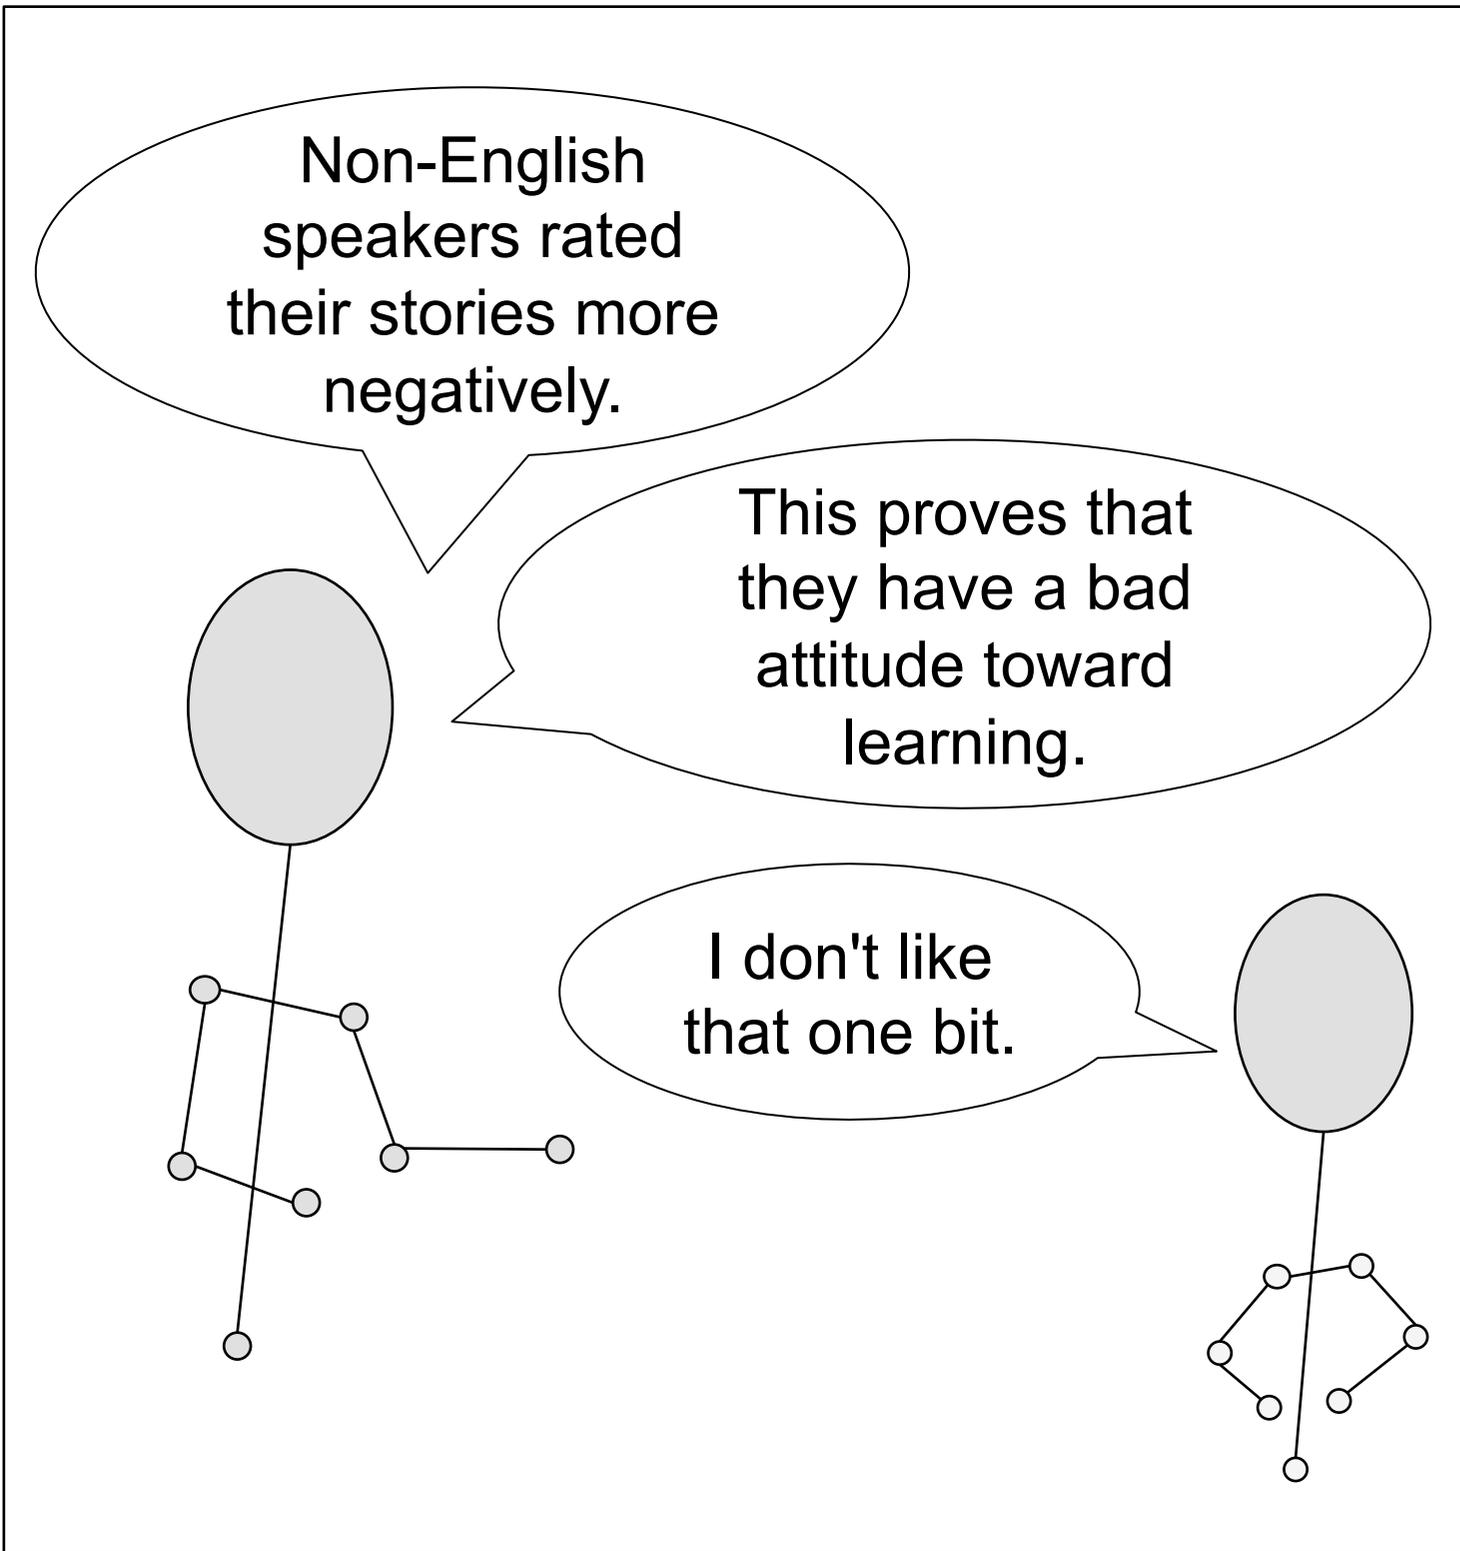

(stories, answers, counts)

Results

(graphs and test values)

Observations

(sentences describing remarkable results)

Non-English speakers rated their stories more negatively.

Maybe they don't feel welcome here.

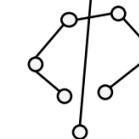

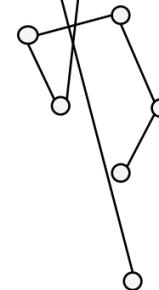

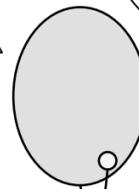

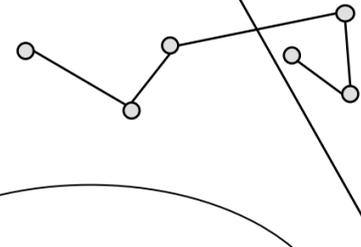

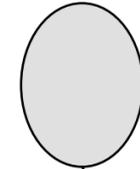

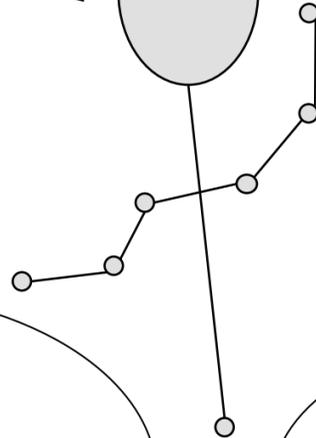

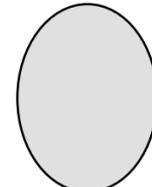

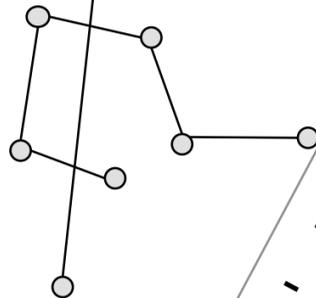

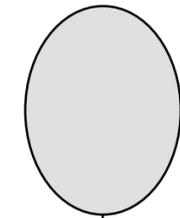

Ha! Slackers, all of them. If they just worked harder...

Can't you see that they have a harder time than everybody else?

I don't think people have tried very hard to welcome them.

We've tried! They won't listen!

- Interpretations
- harder time
 - don't feel welcome
 - obligation ignored
 - bad attitude
 - communication failed

Older people are more likely to keep dogs outside.

They don't know dogs are social.

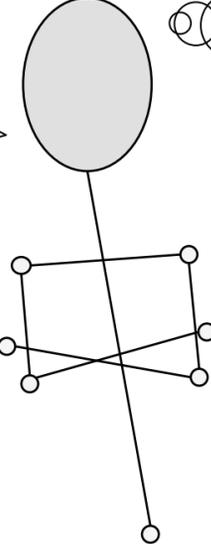

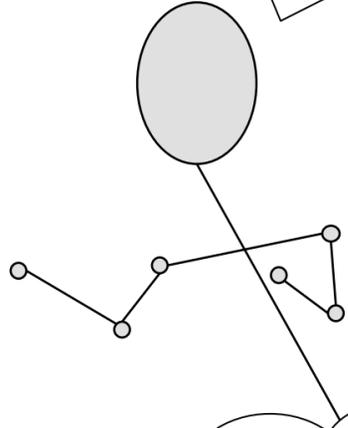

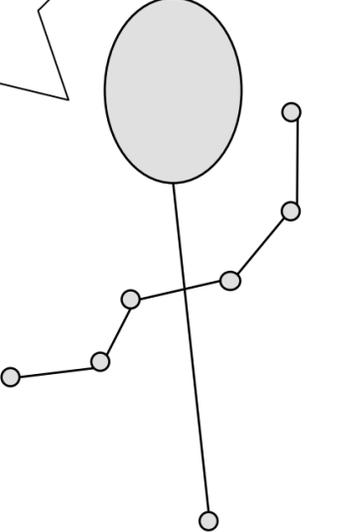

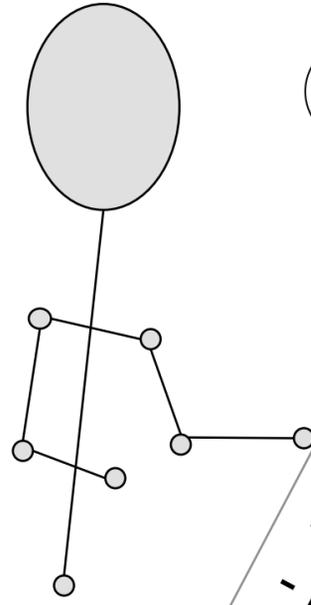

Ha!
Stop wasting your money on dumb animals. What will you do when times get rough?

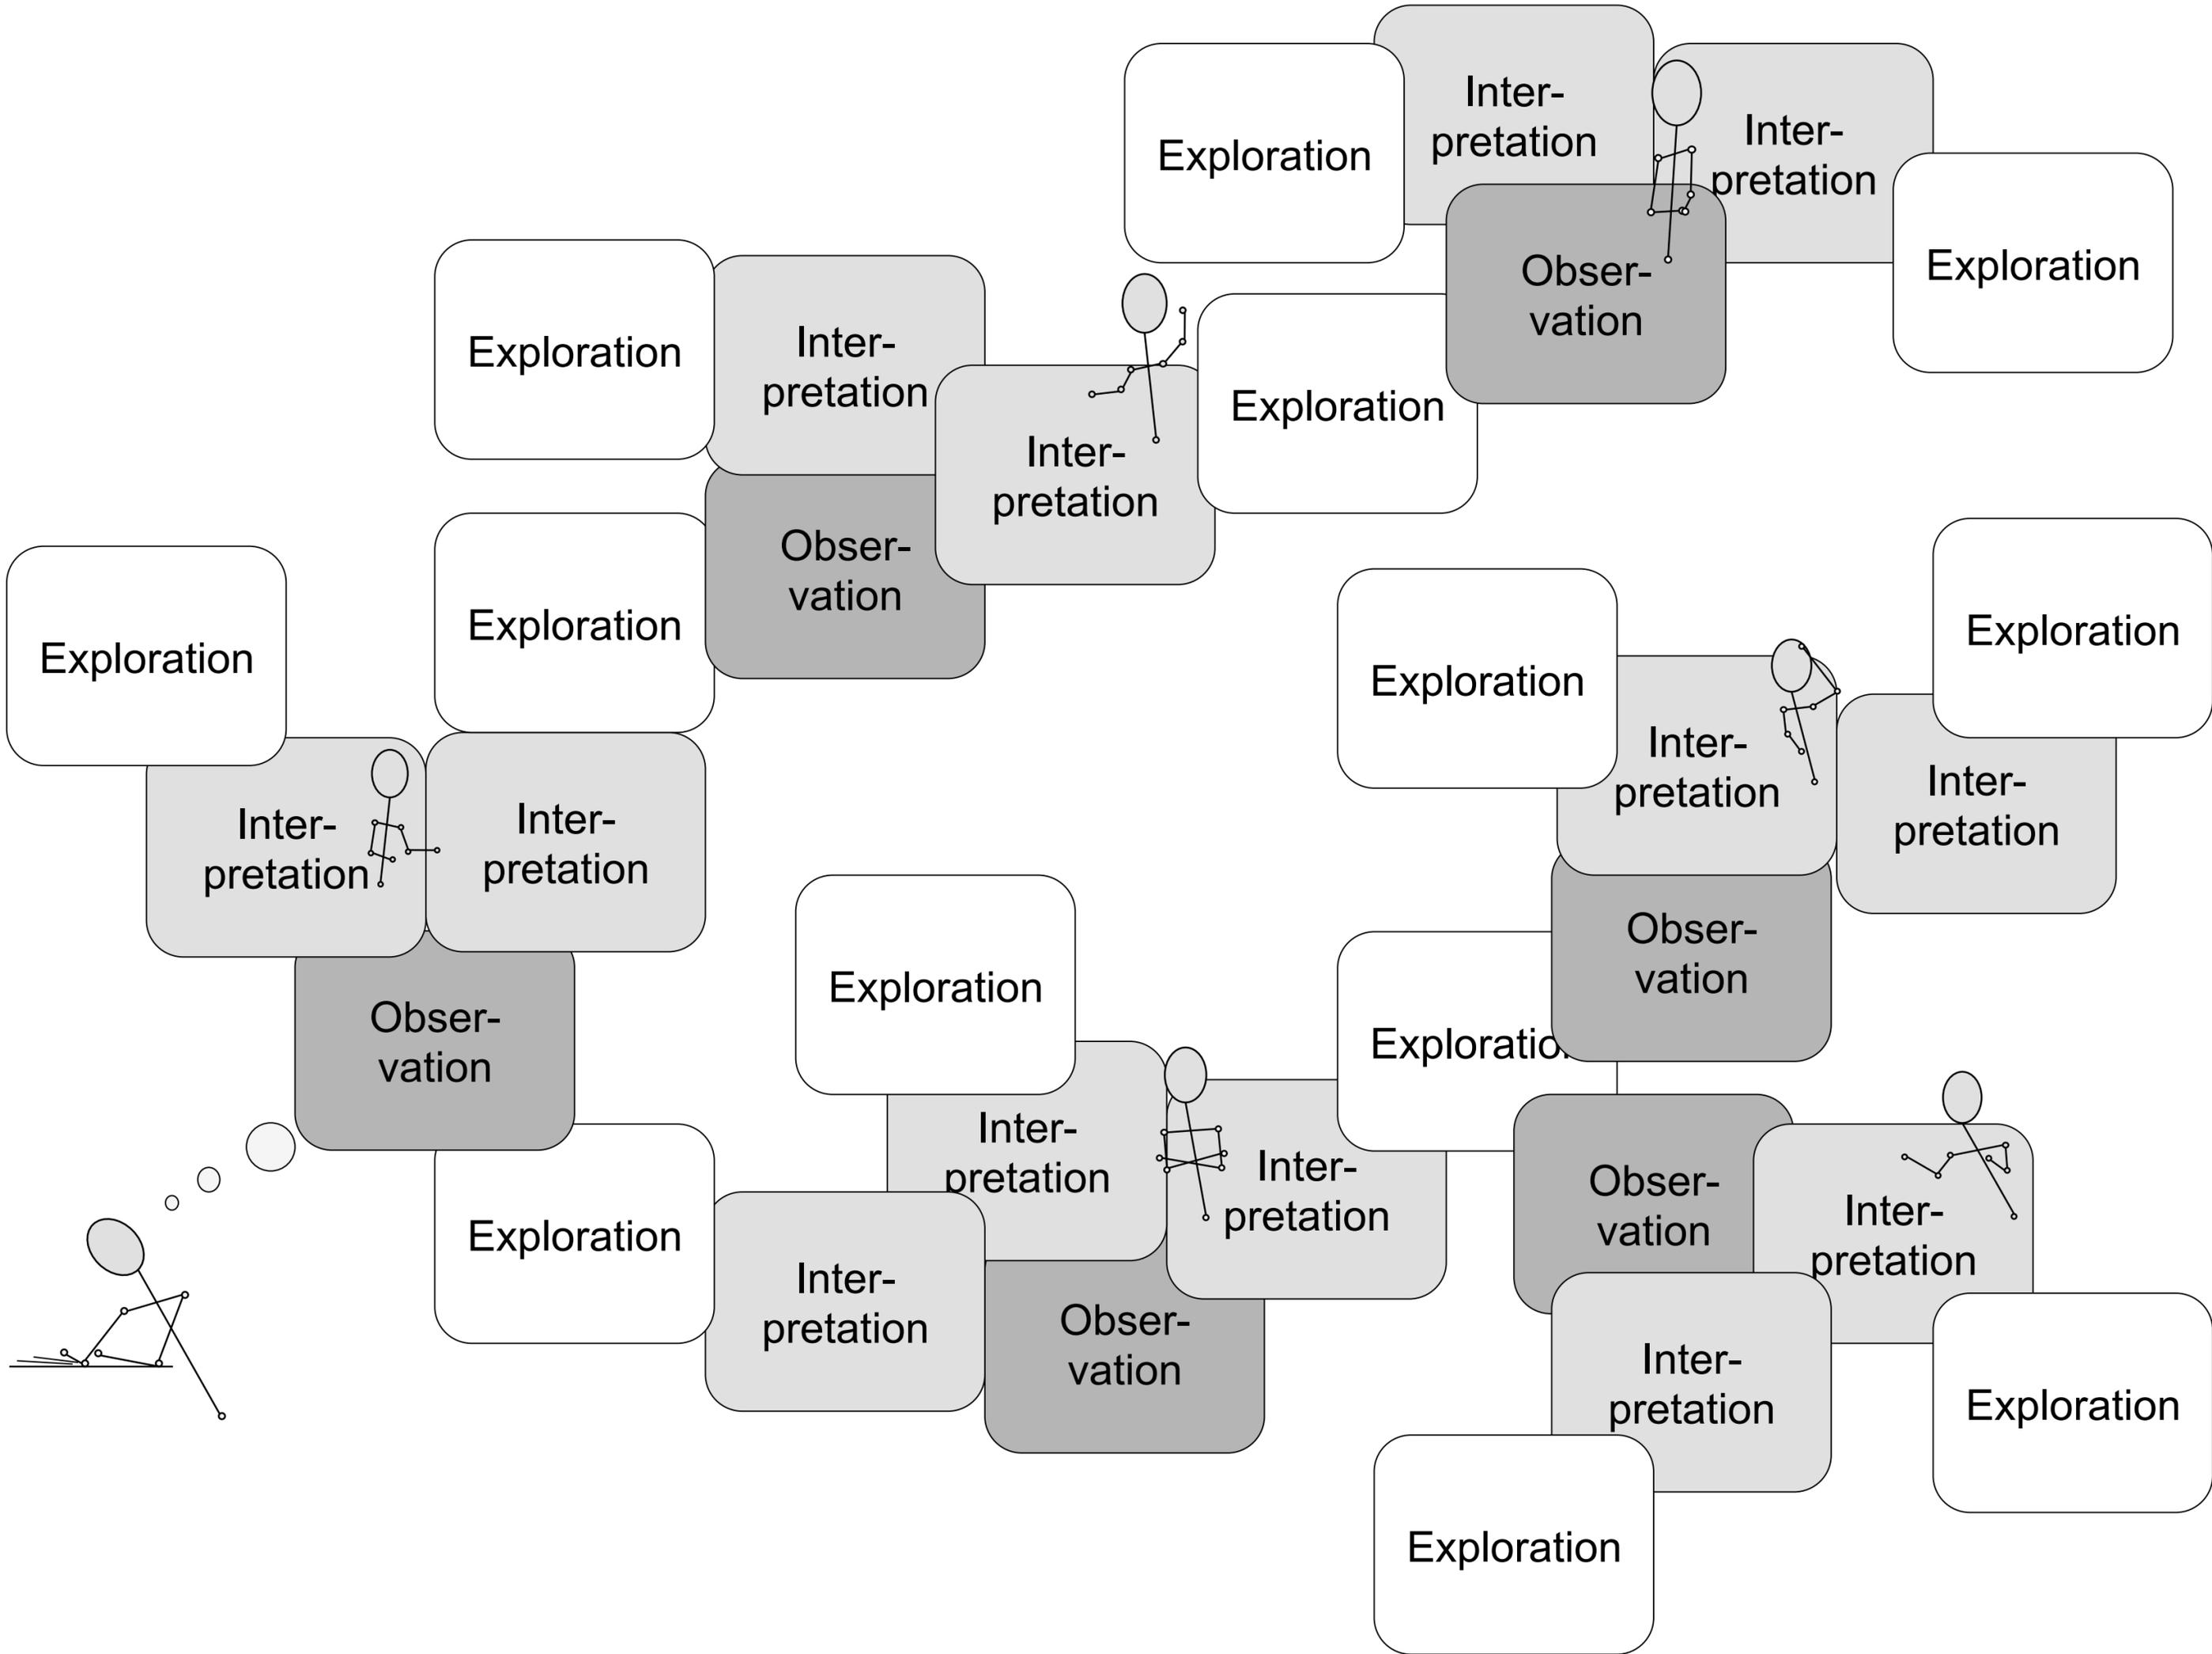

Ha! Get a life and make some real friends.

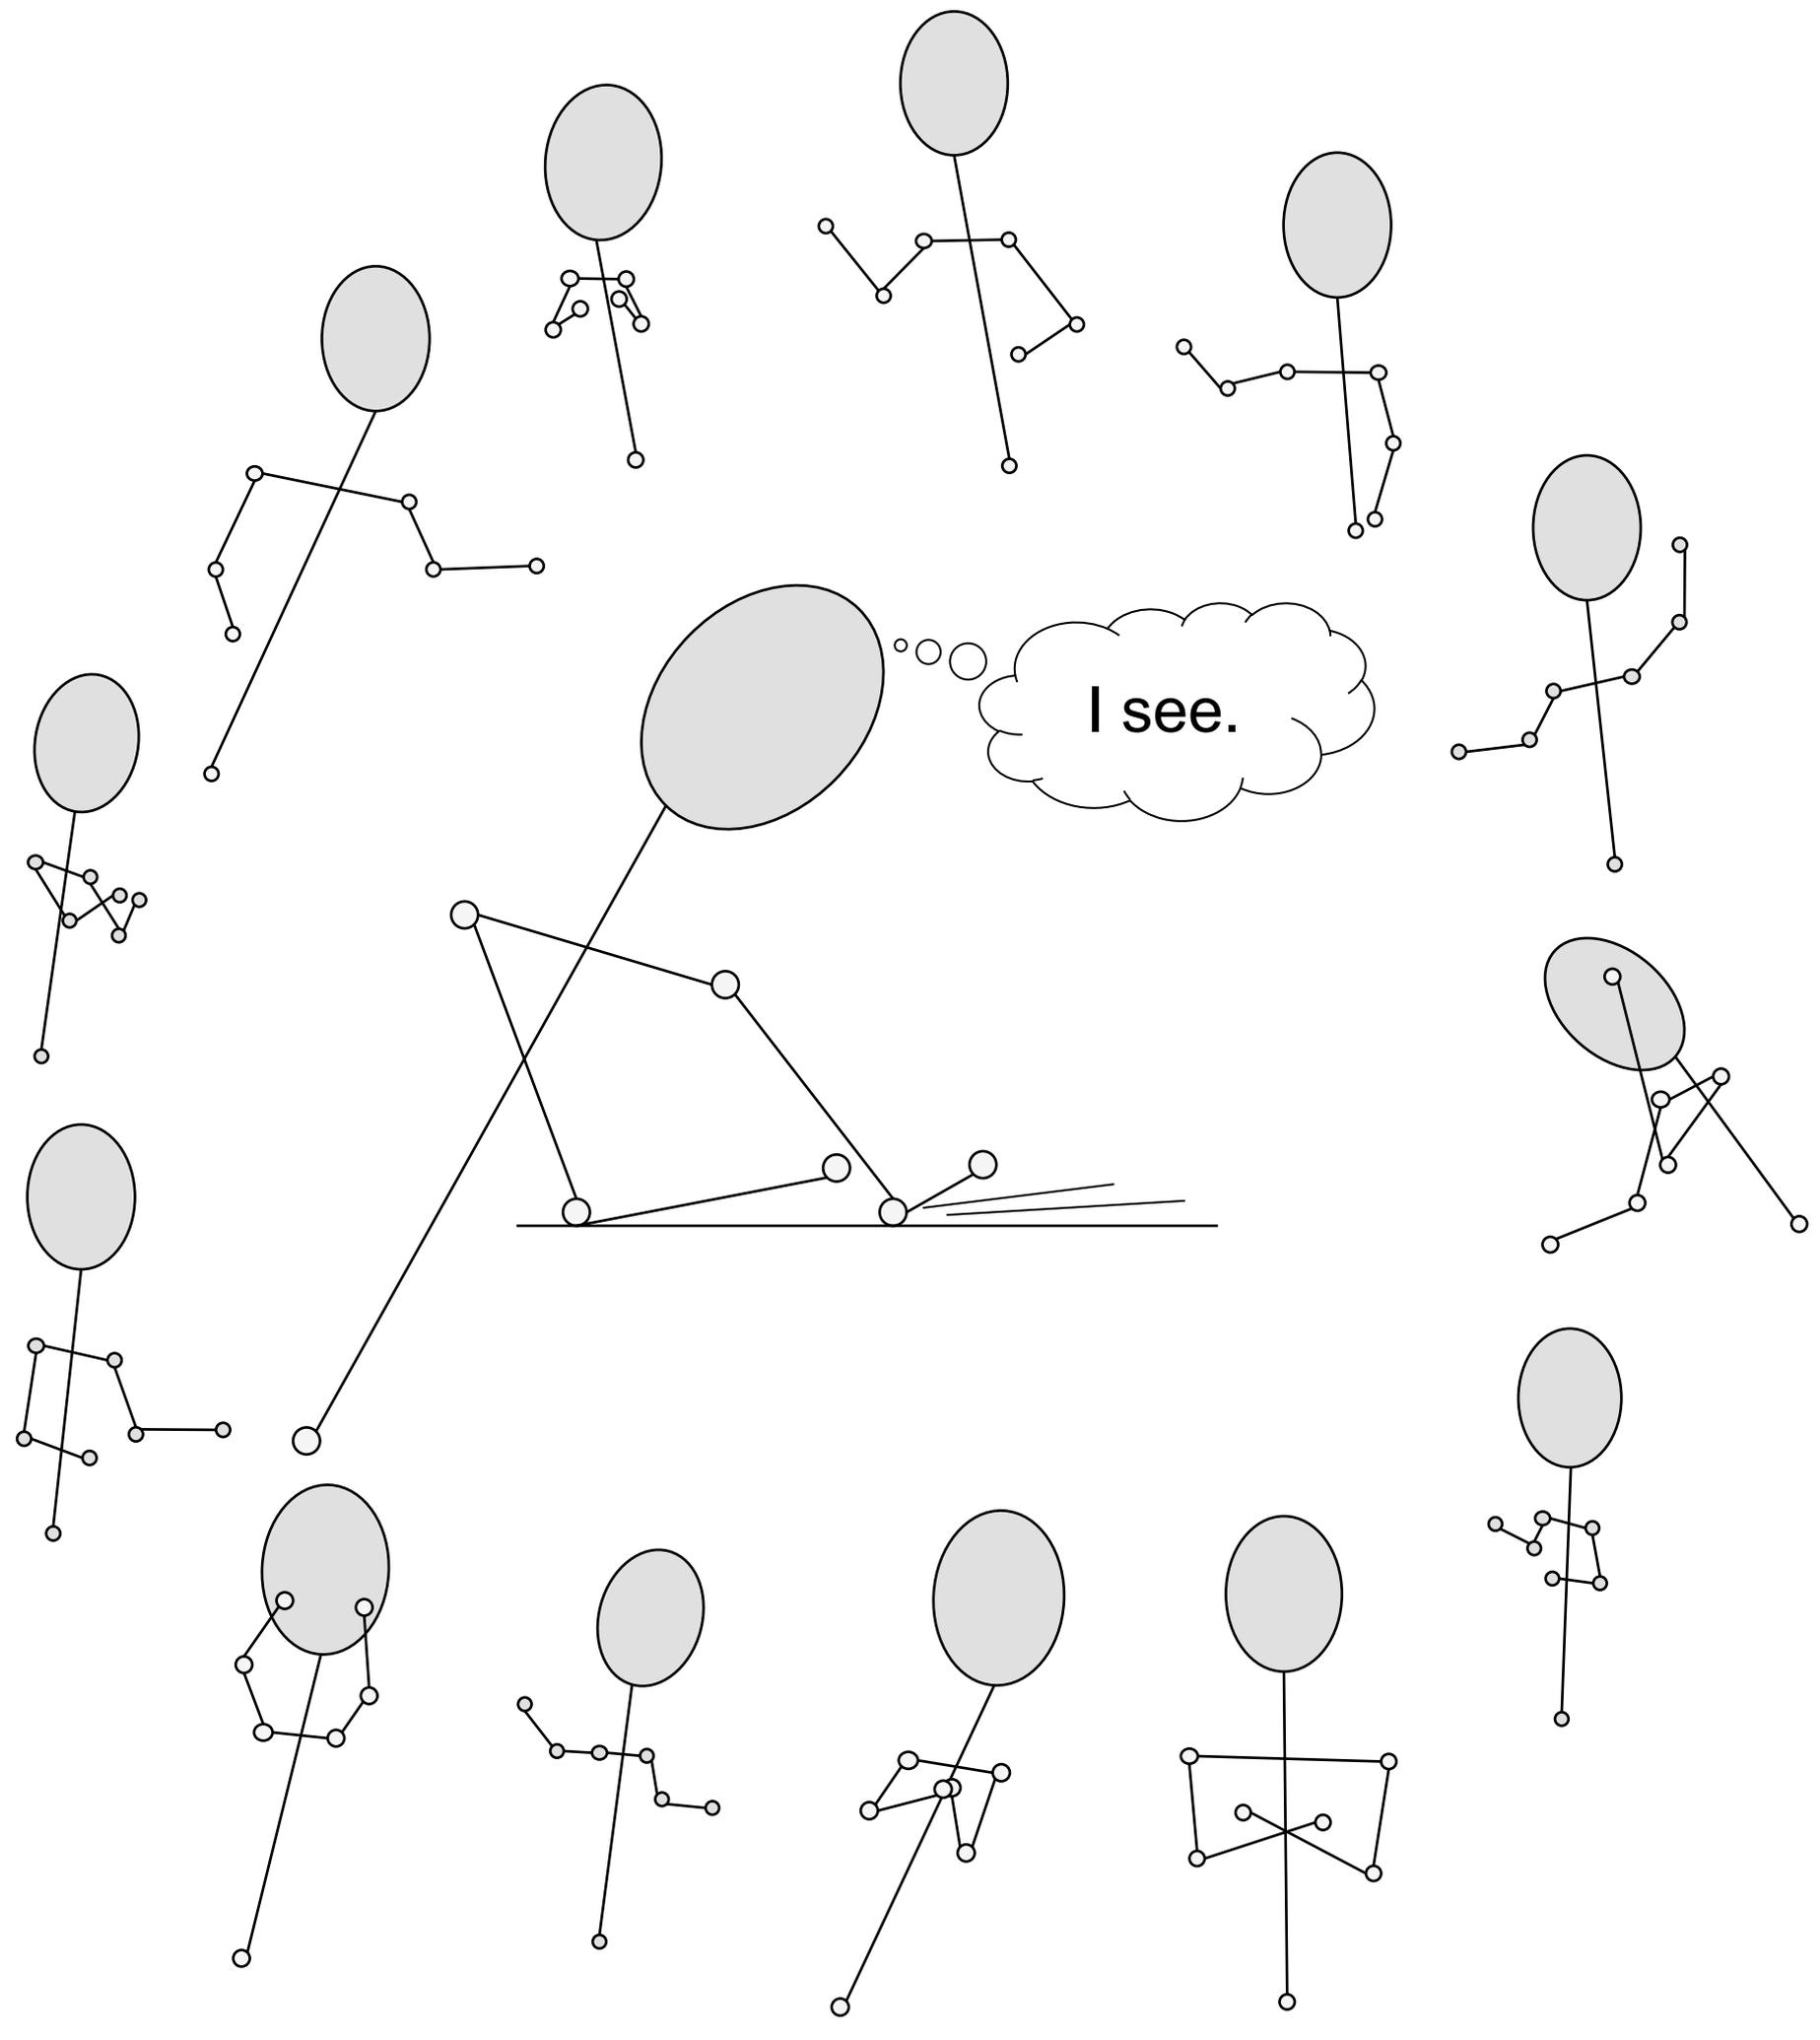

Dogs are unclean and should not be in the home.

No, that one's not relevant or useful to the project.

Interpretations
- frugal and careful
- don't understand dogs
- have human friends

I see.

Which one of these do you think is my opinion?

I don't know, communication failed?

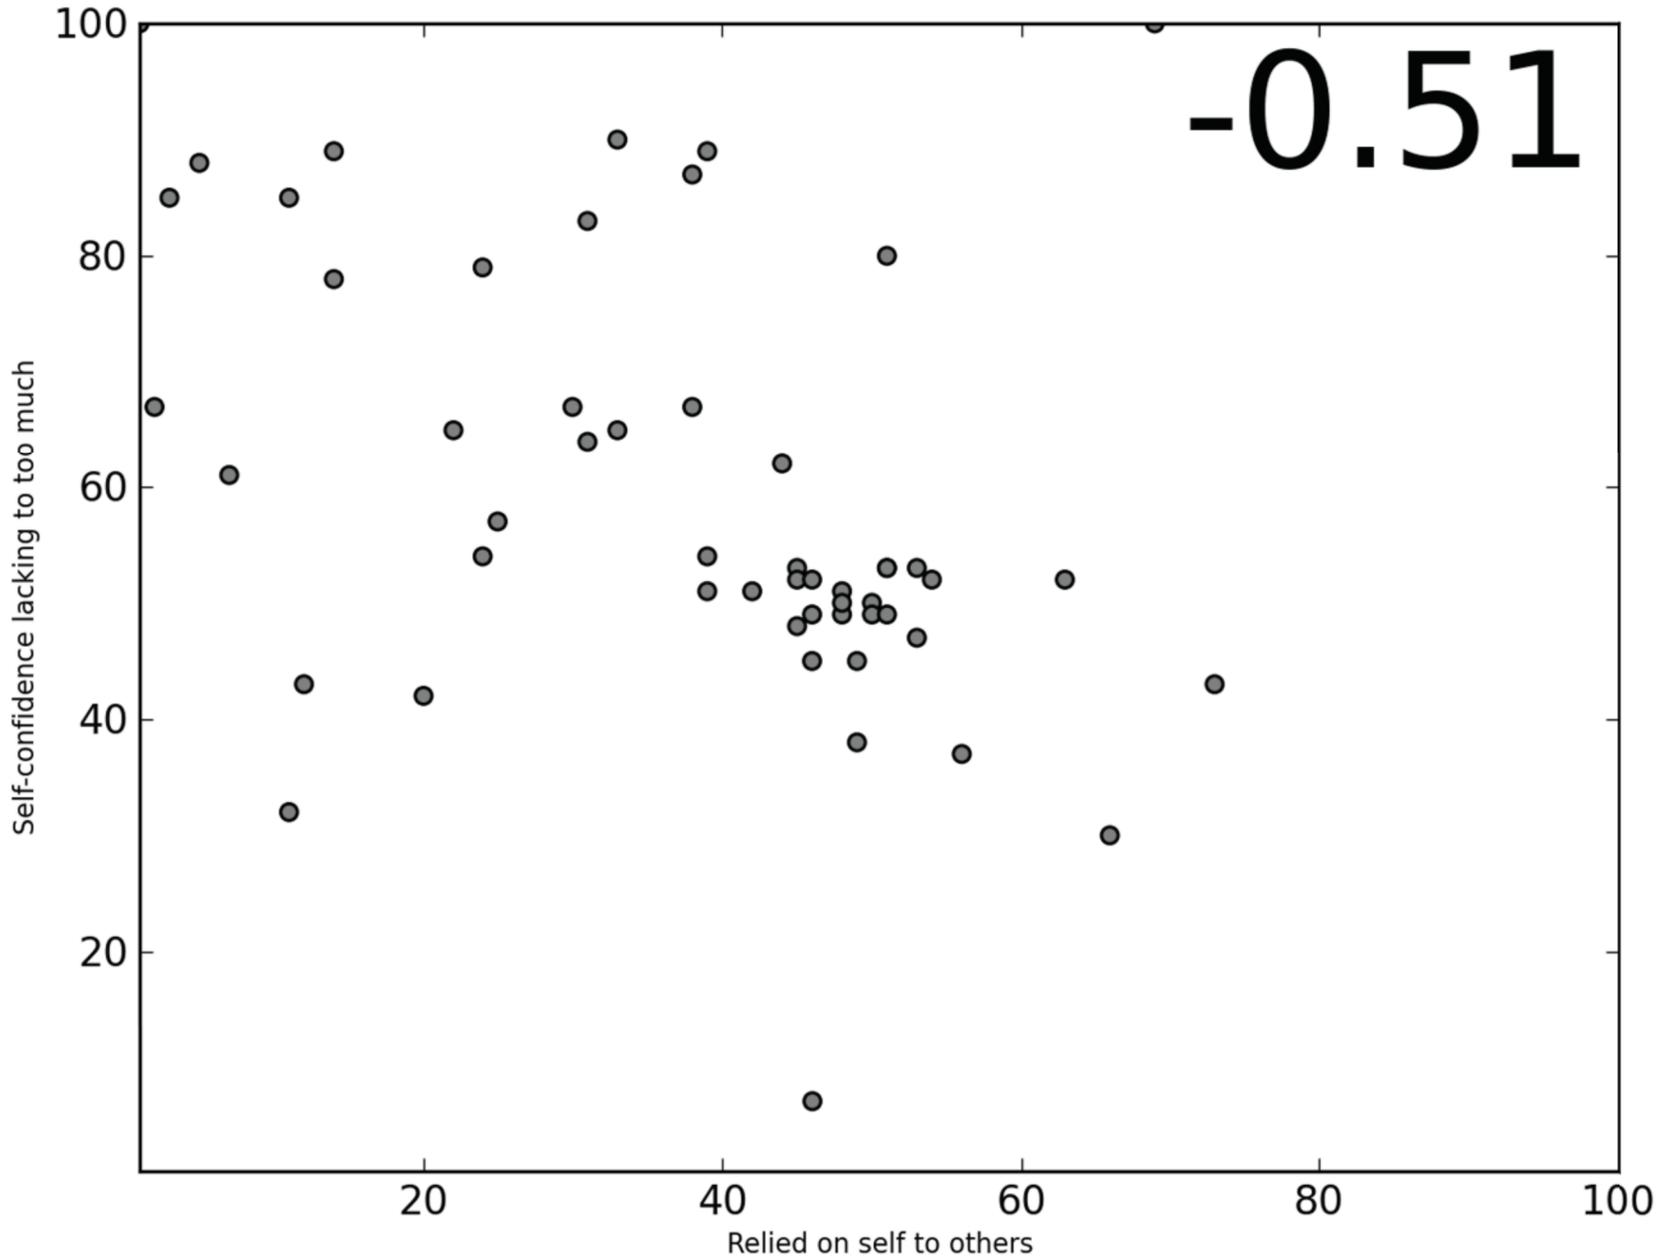

Yes! I'm doing it right.

Observation:
Non-English speakers rated their stories more negatively.

Interpretations:

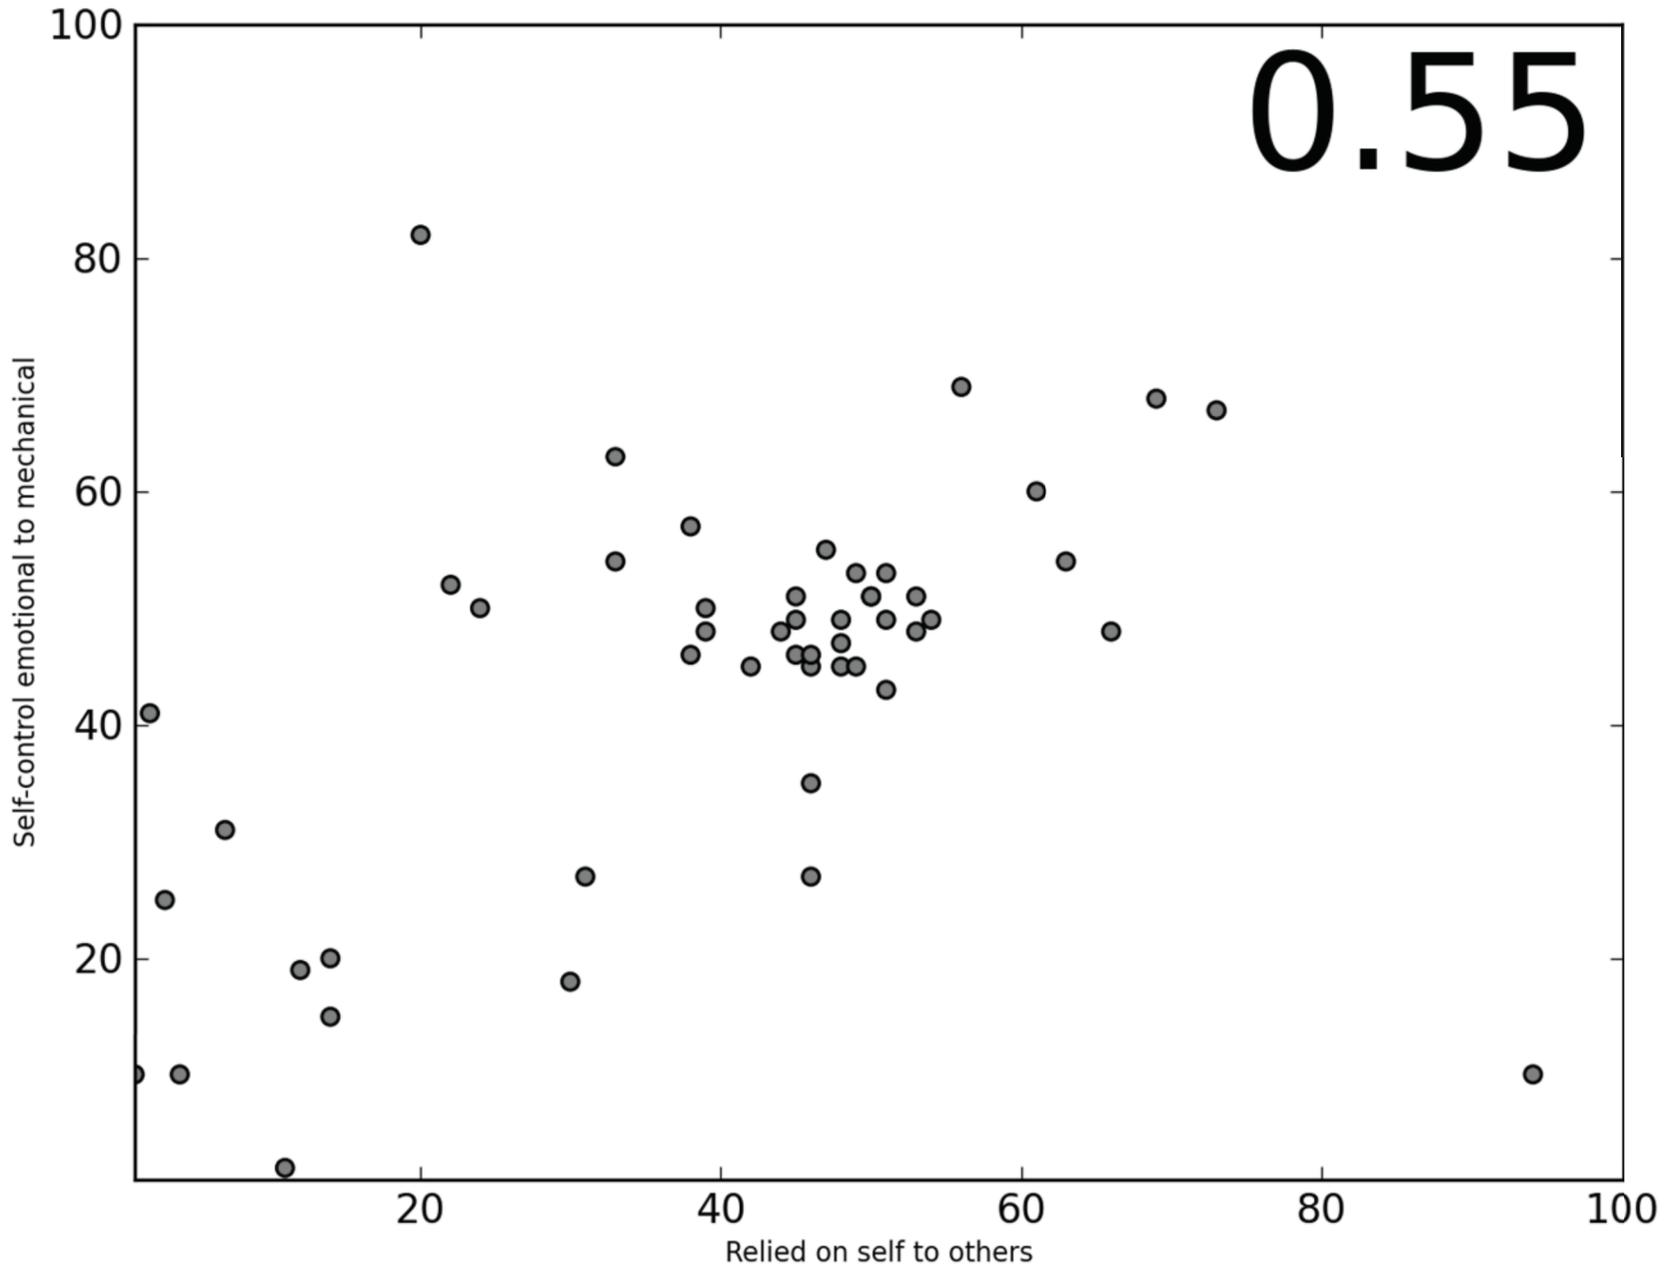

- harder time
- don't feel welcome
- obligation ignored
- bad attitude
- communication failed

Relied on self to others X Self-confidence lacking to too much

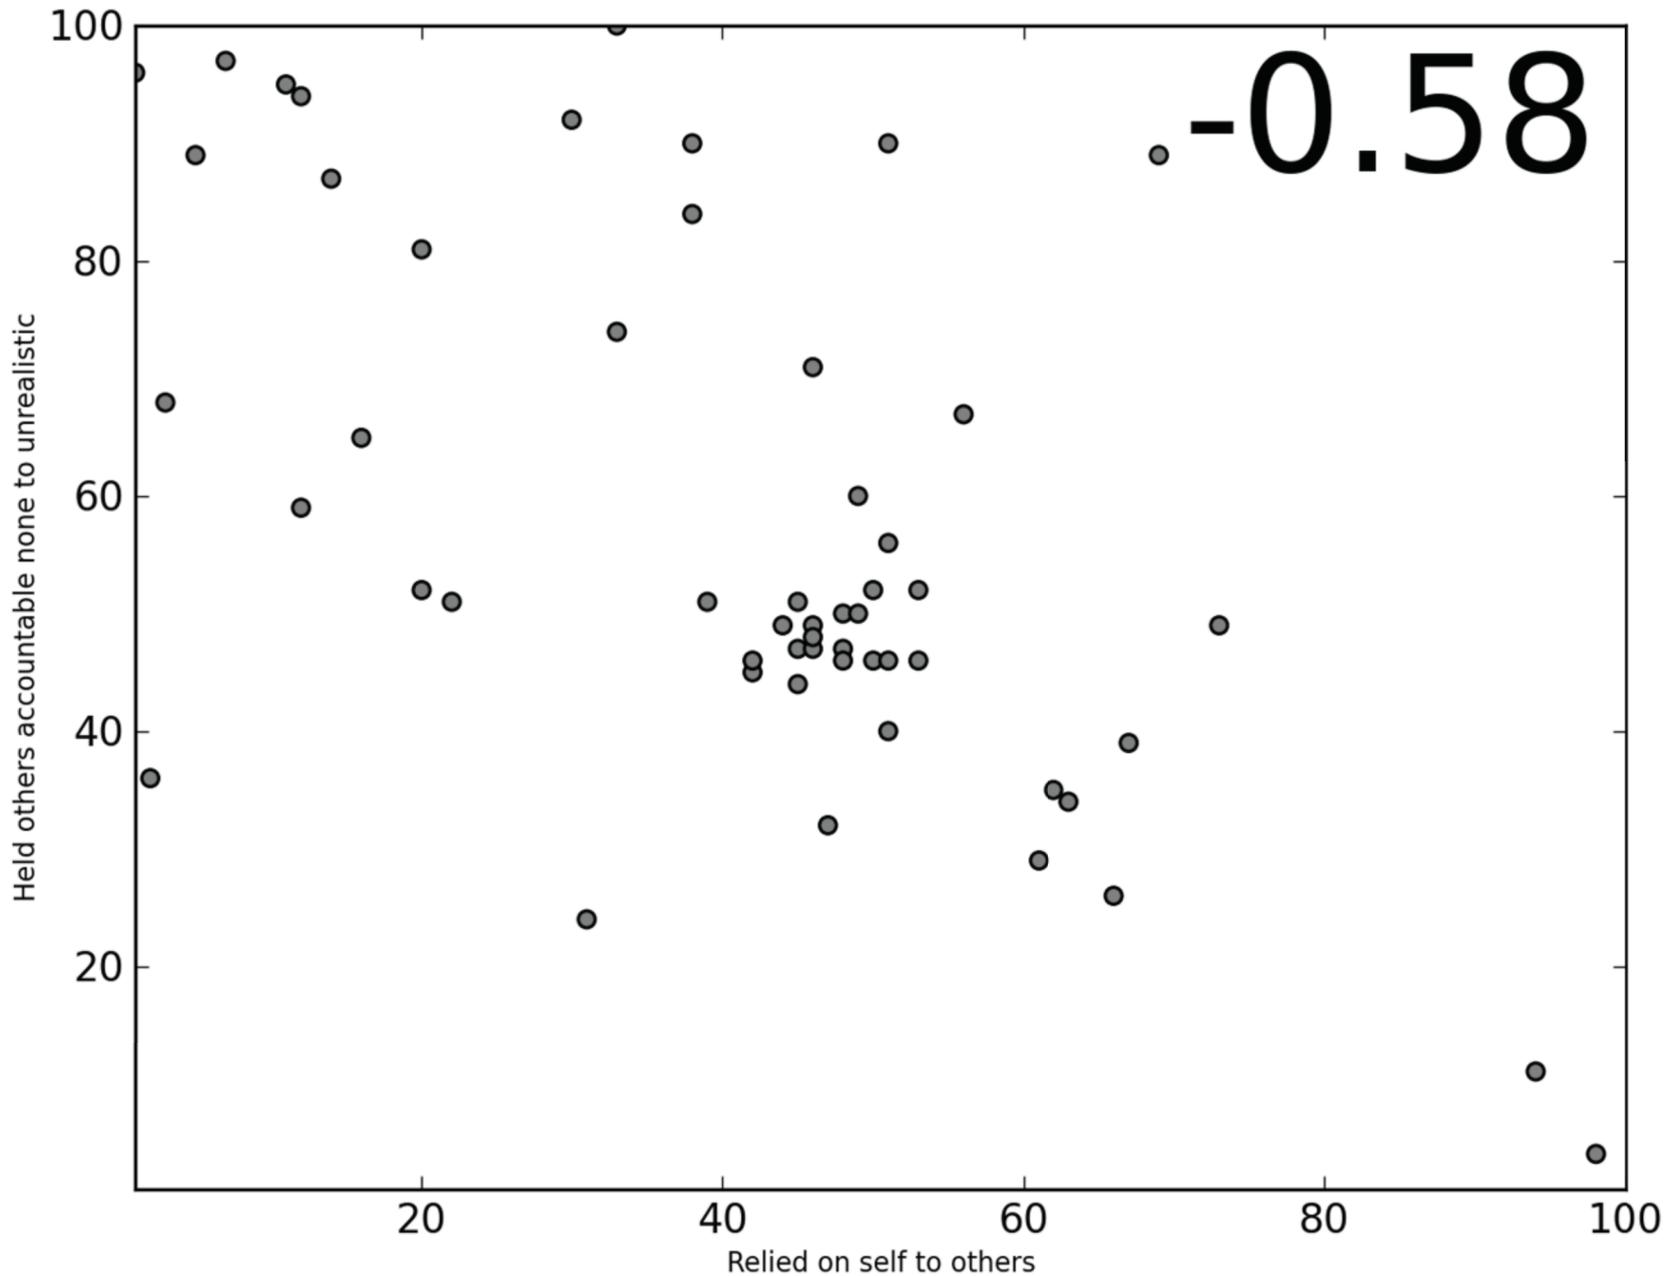

n=60, both axes normal=True, r=-0.511, p=0.000

Relied on self to others X Self-control emotional to mechanical

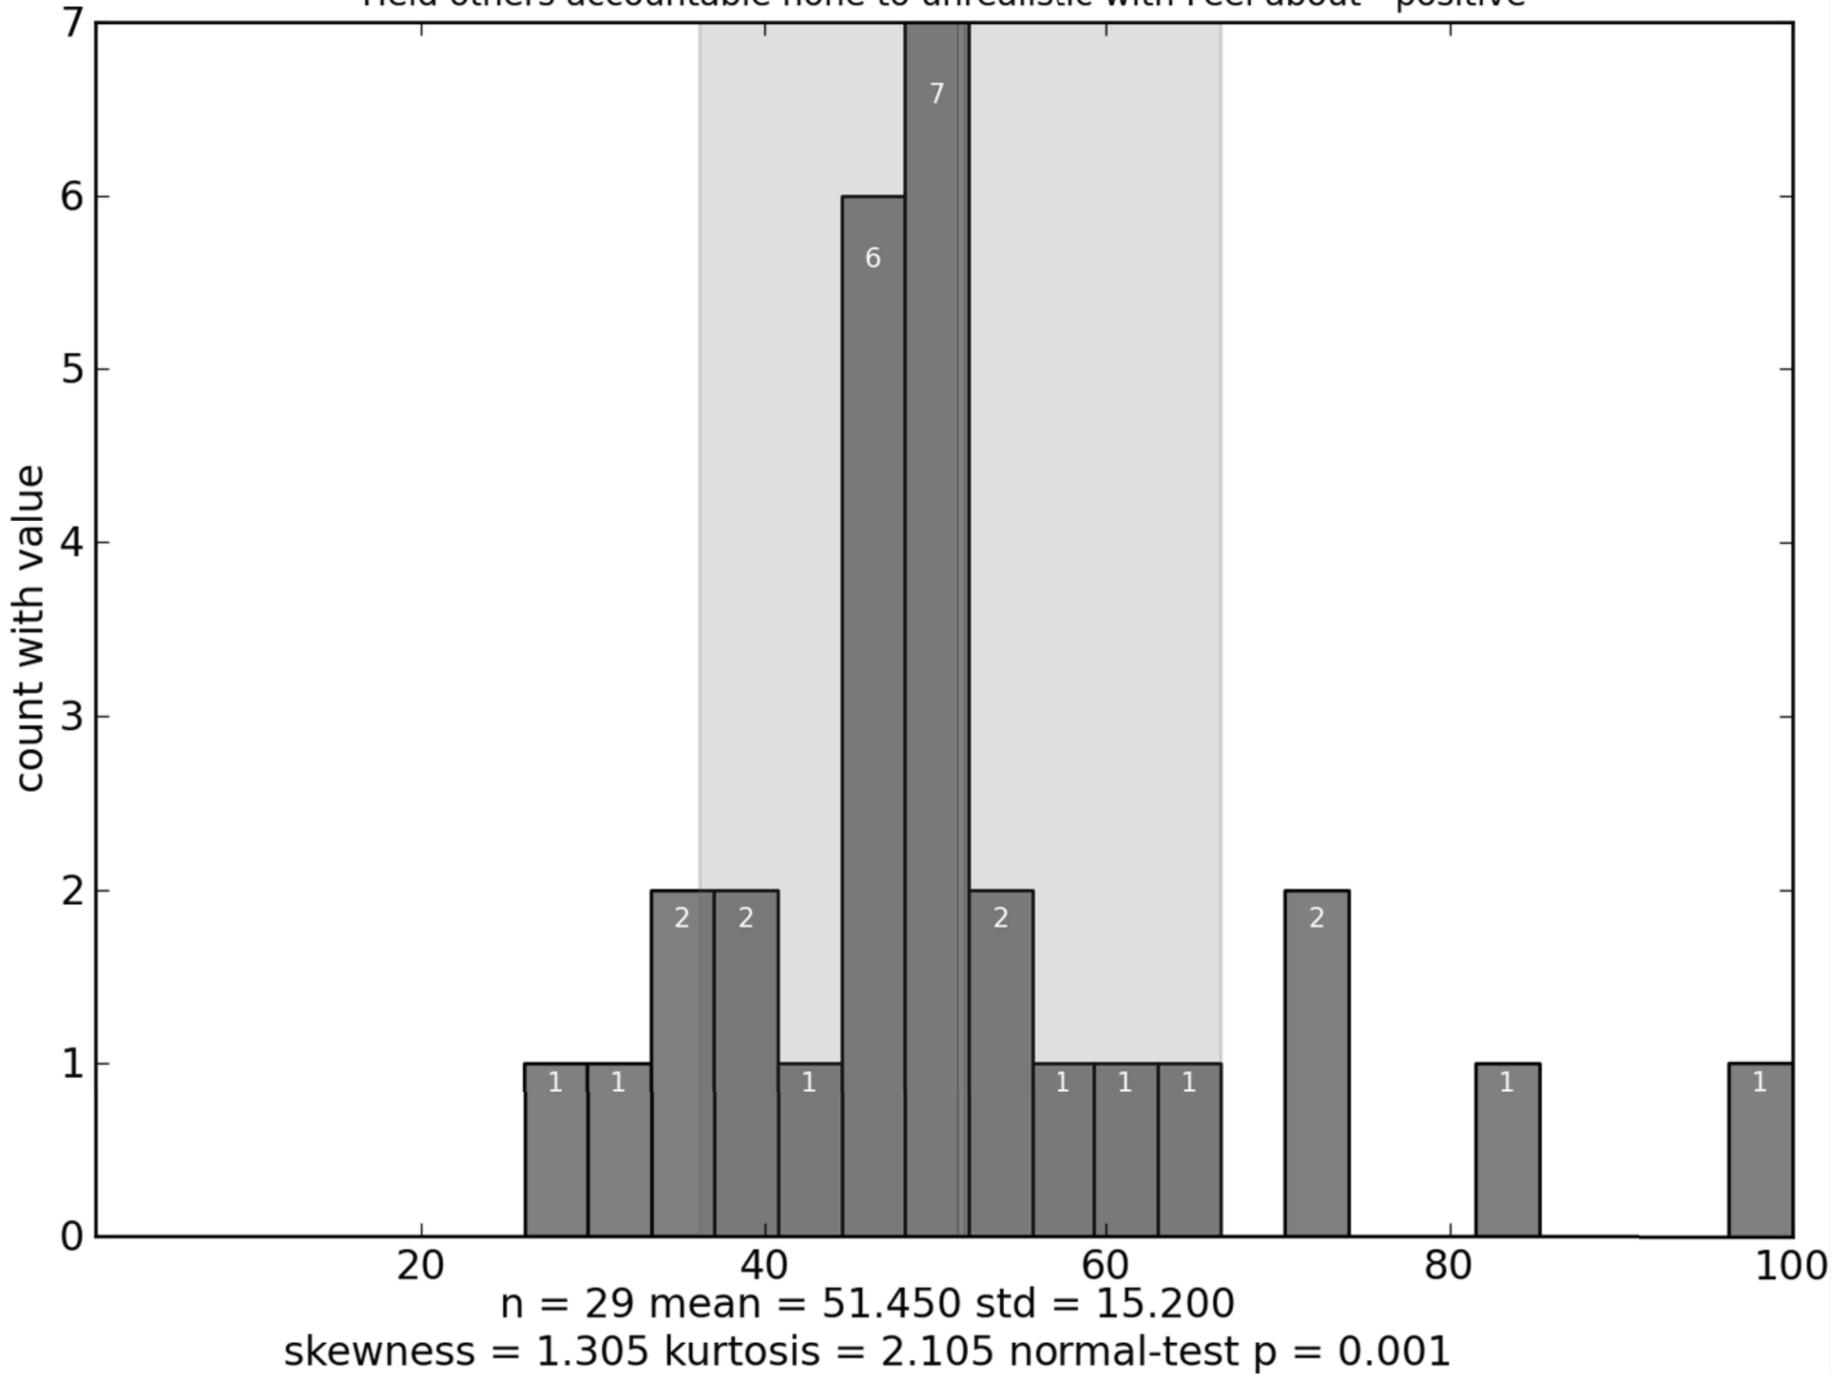

n=58, both axes normal=True, r=0.552, p=0.000

Relied on self to others X Held others accountable none to unrealistic

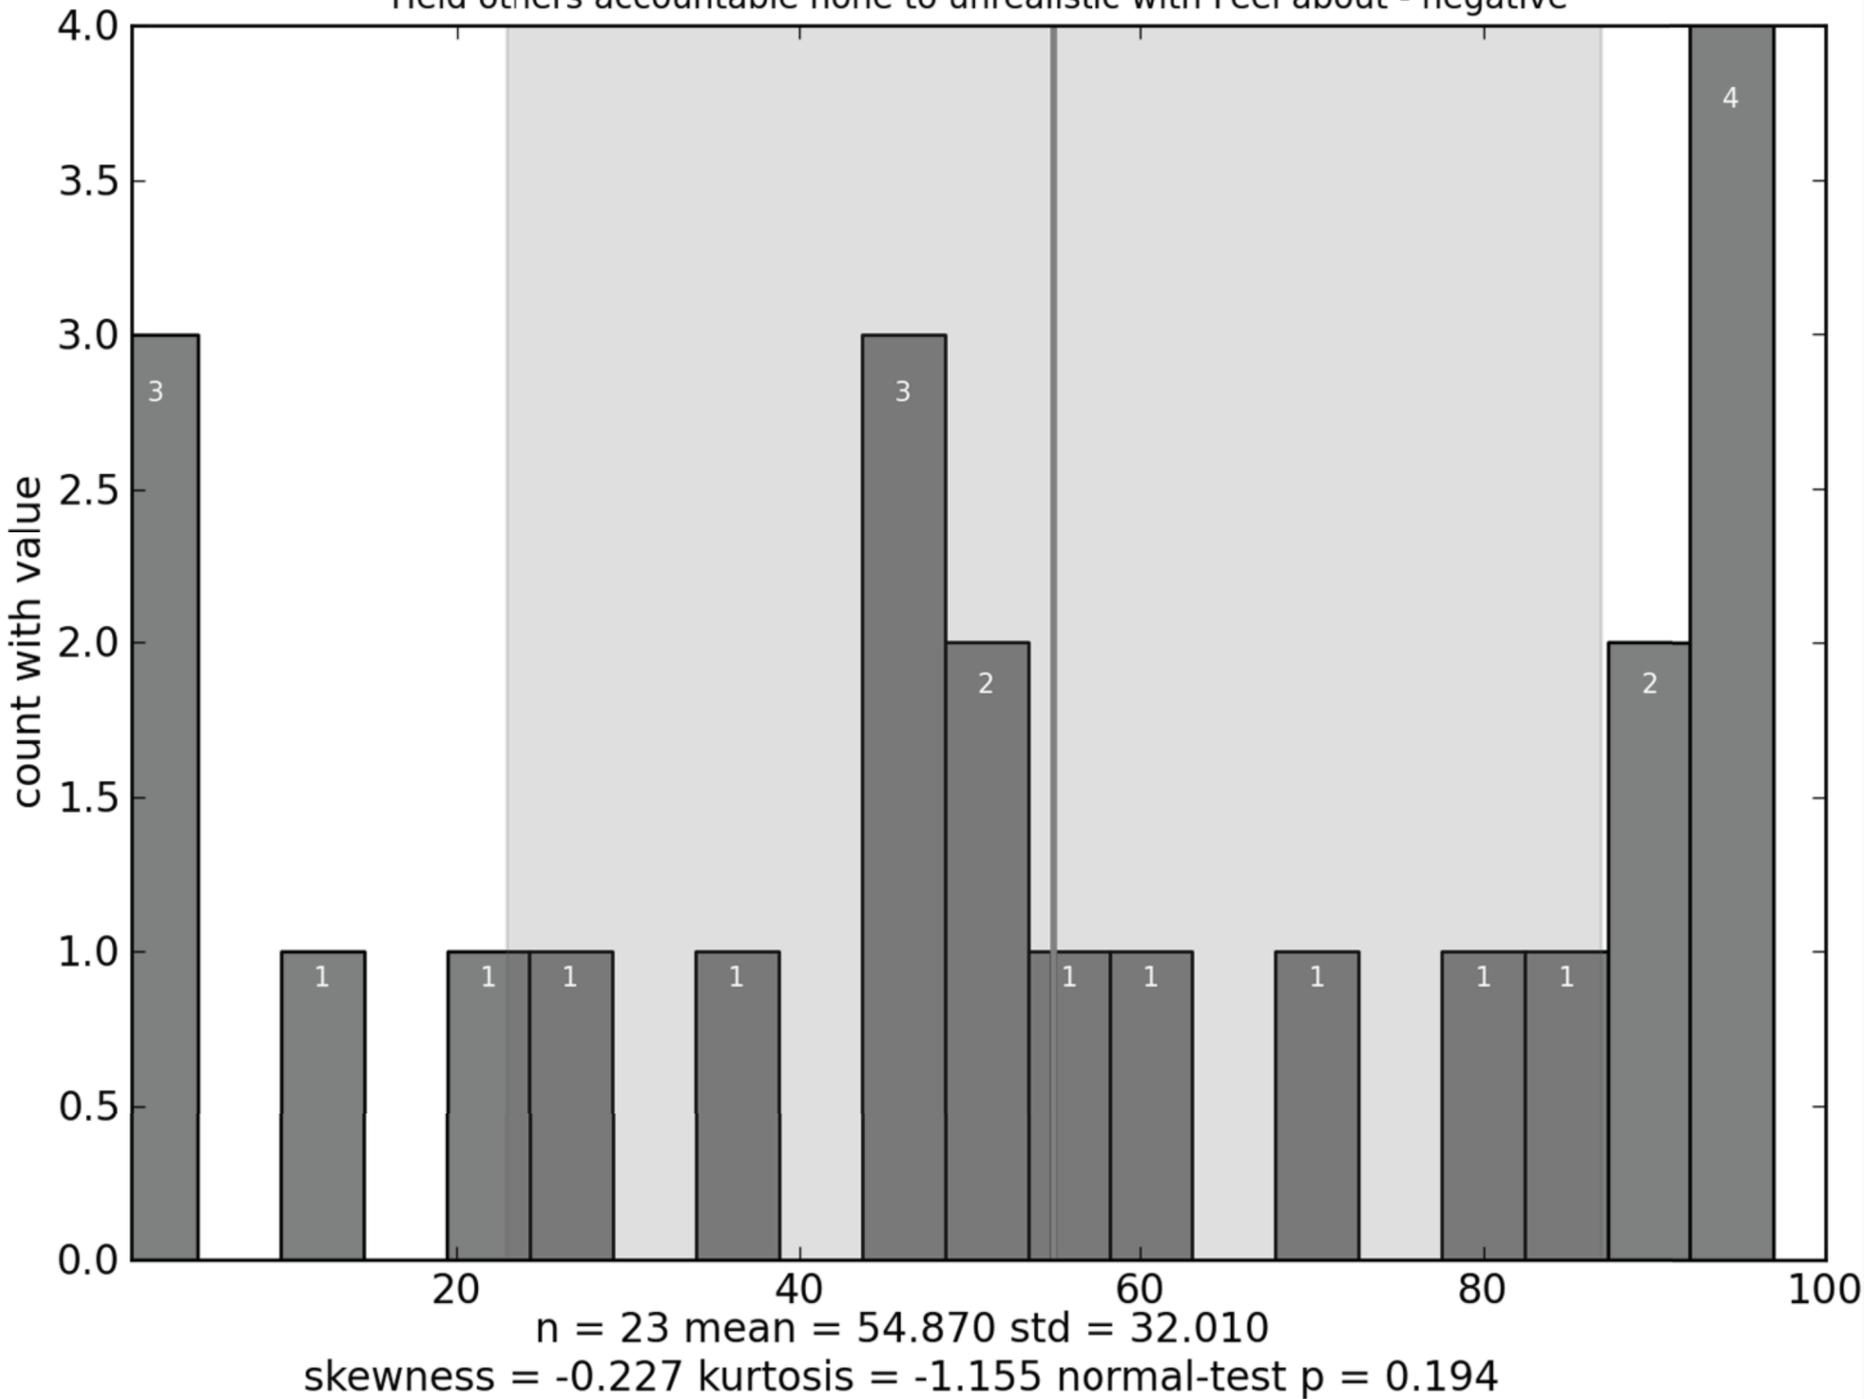

n=55, both axes normal=True, r=-0.580, p=0.000

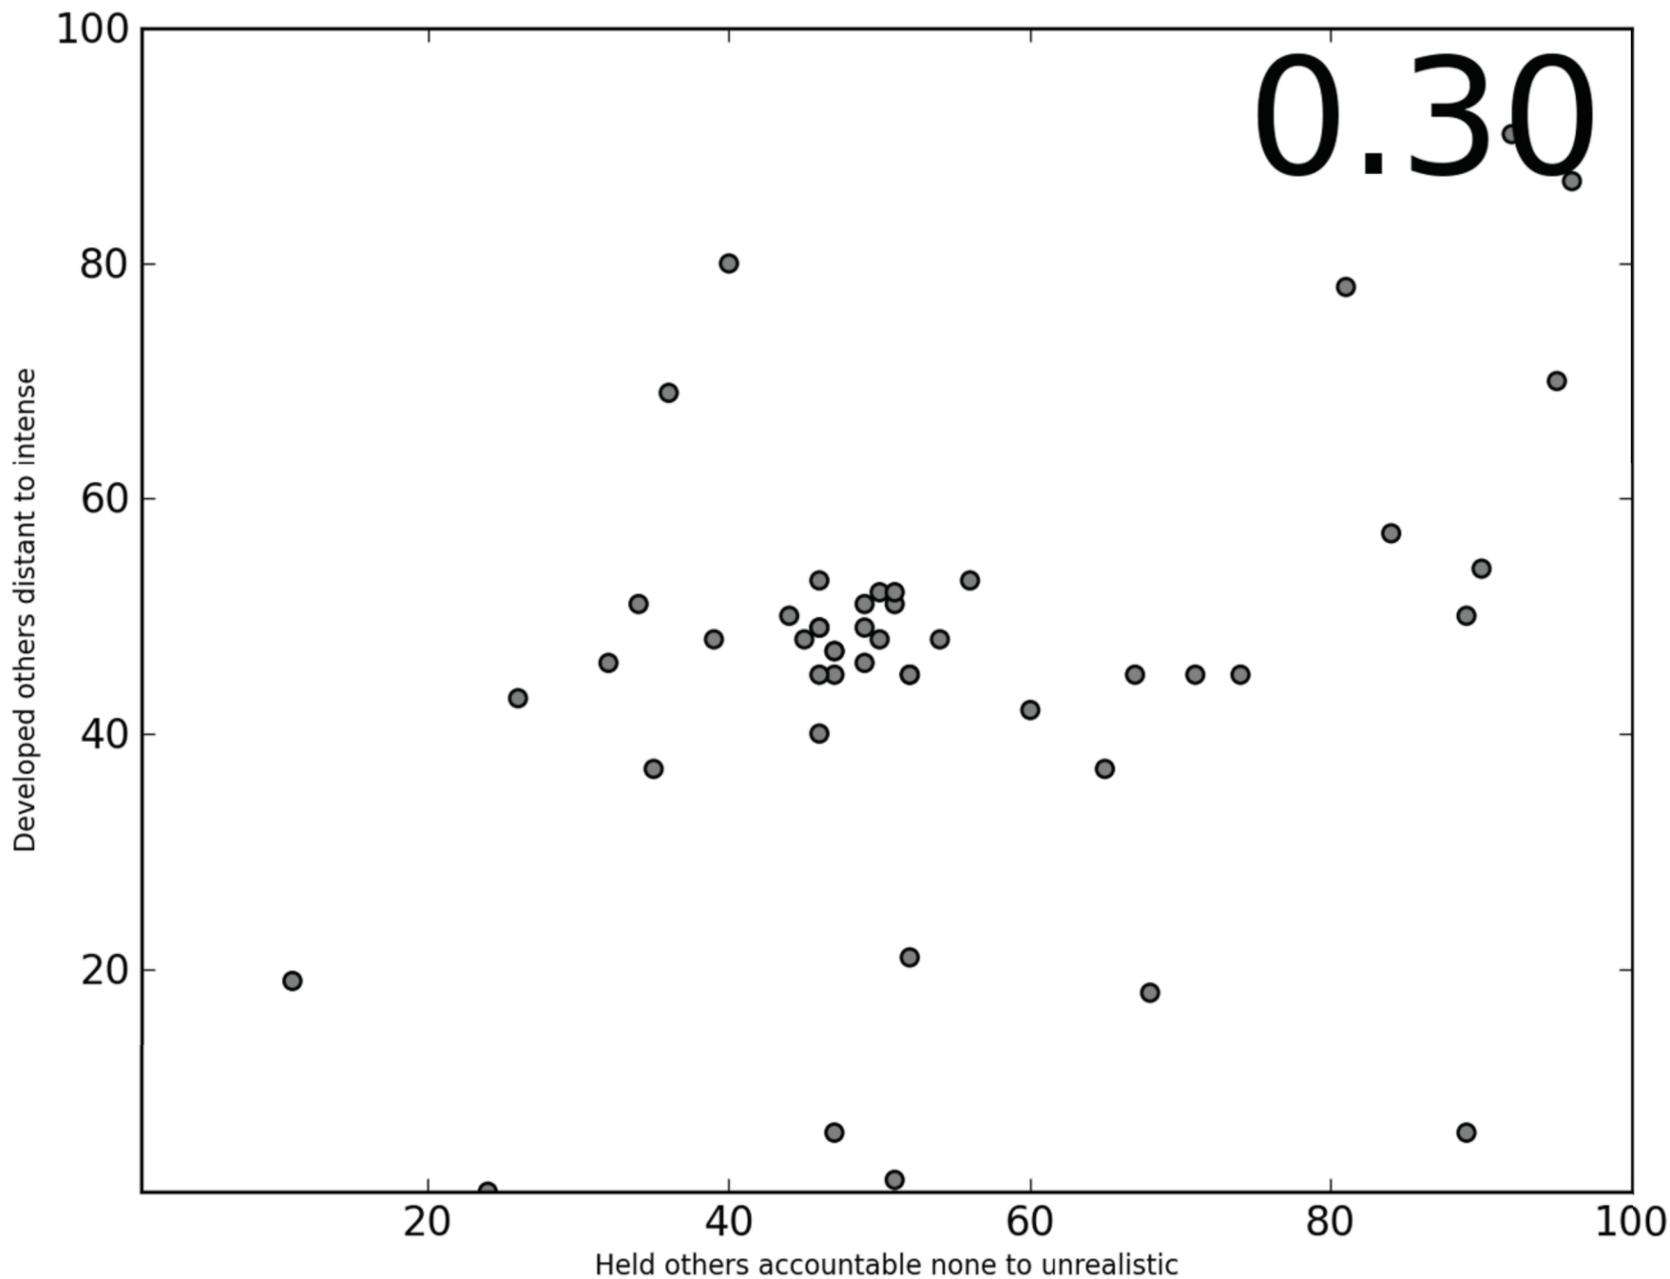

Held others accountable none to unrealistic with Feel about - positive

Held others accountable none to unrealistic with Feel about - negative

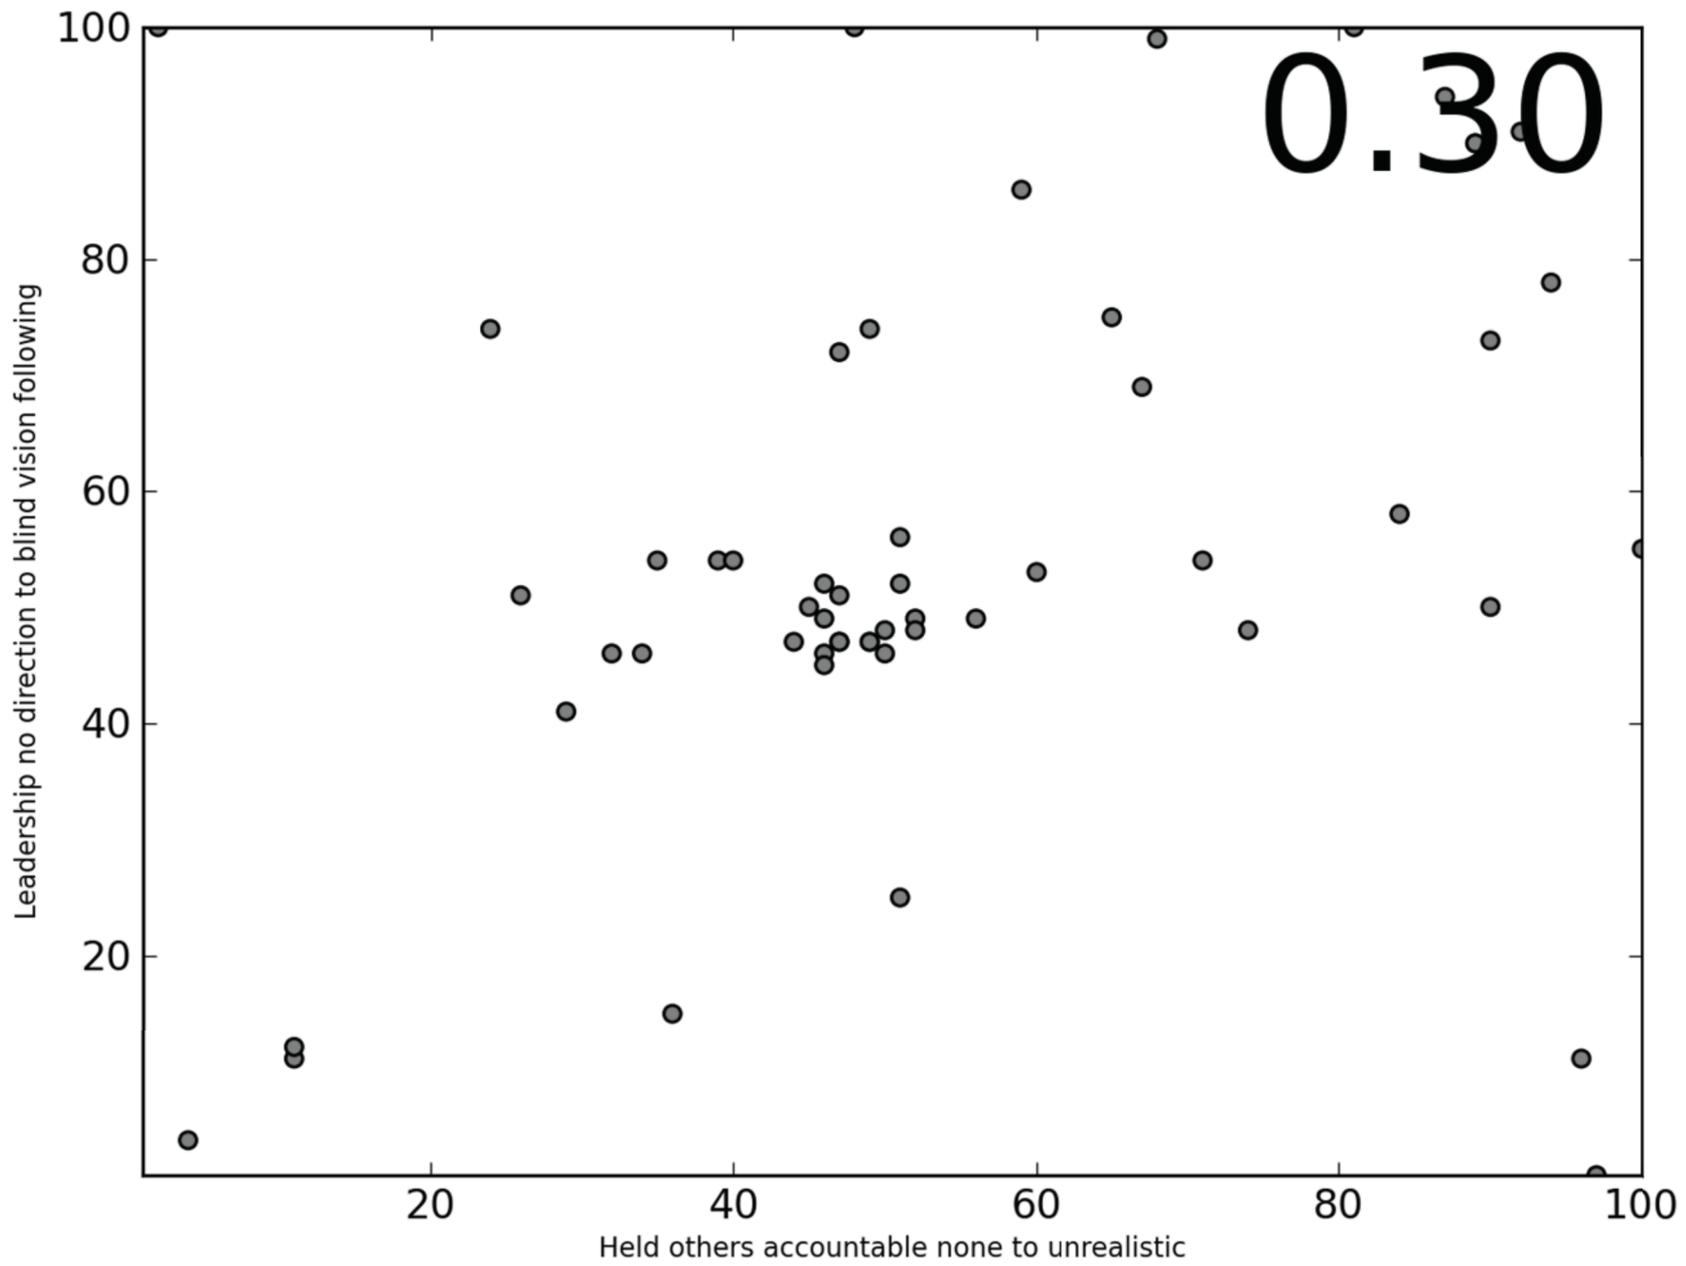

Held others accountable none to unrealistic X Developed others distant to intense

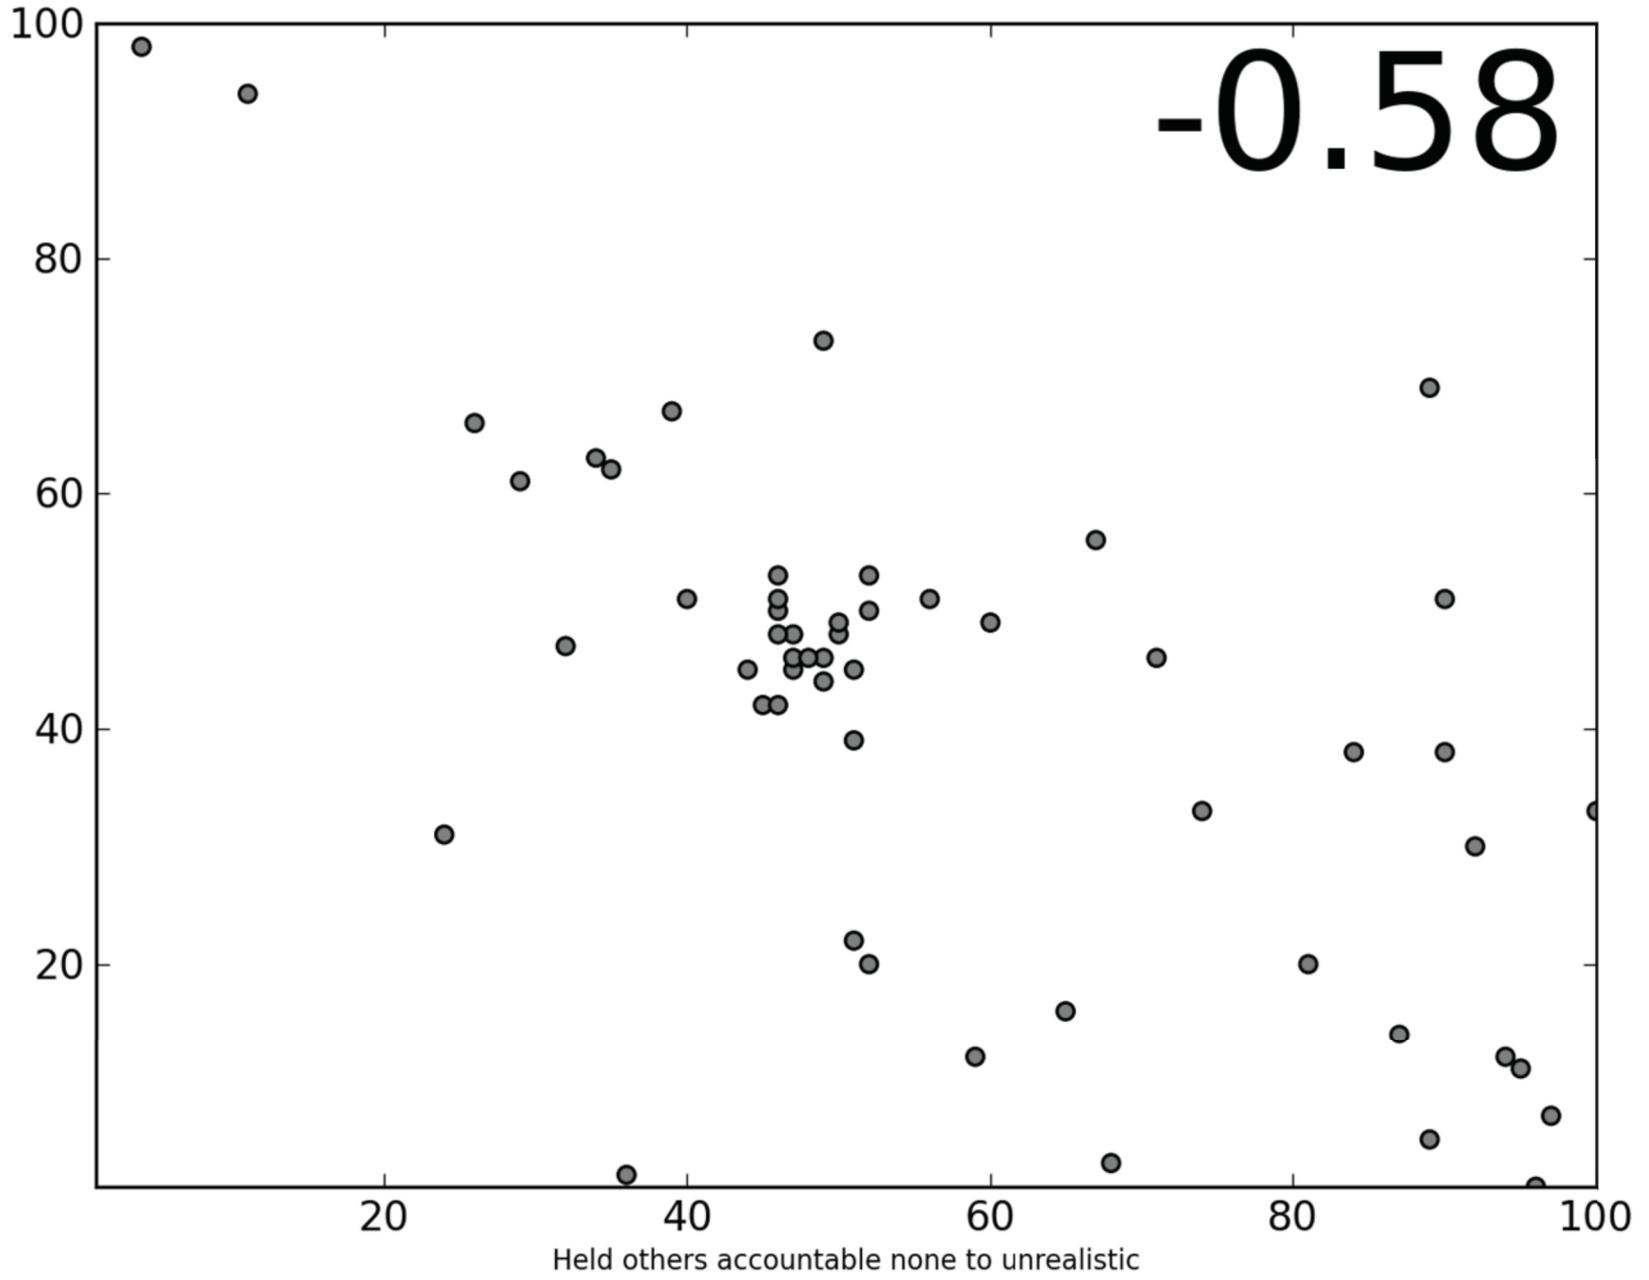

n=49, both axes normal=True, r=0.301, p=0.036

Held others accountable none to unrealistic X Leadership no direction to blind vision following

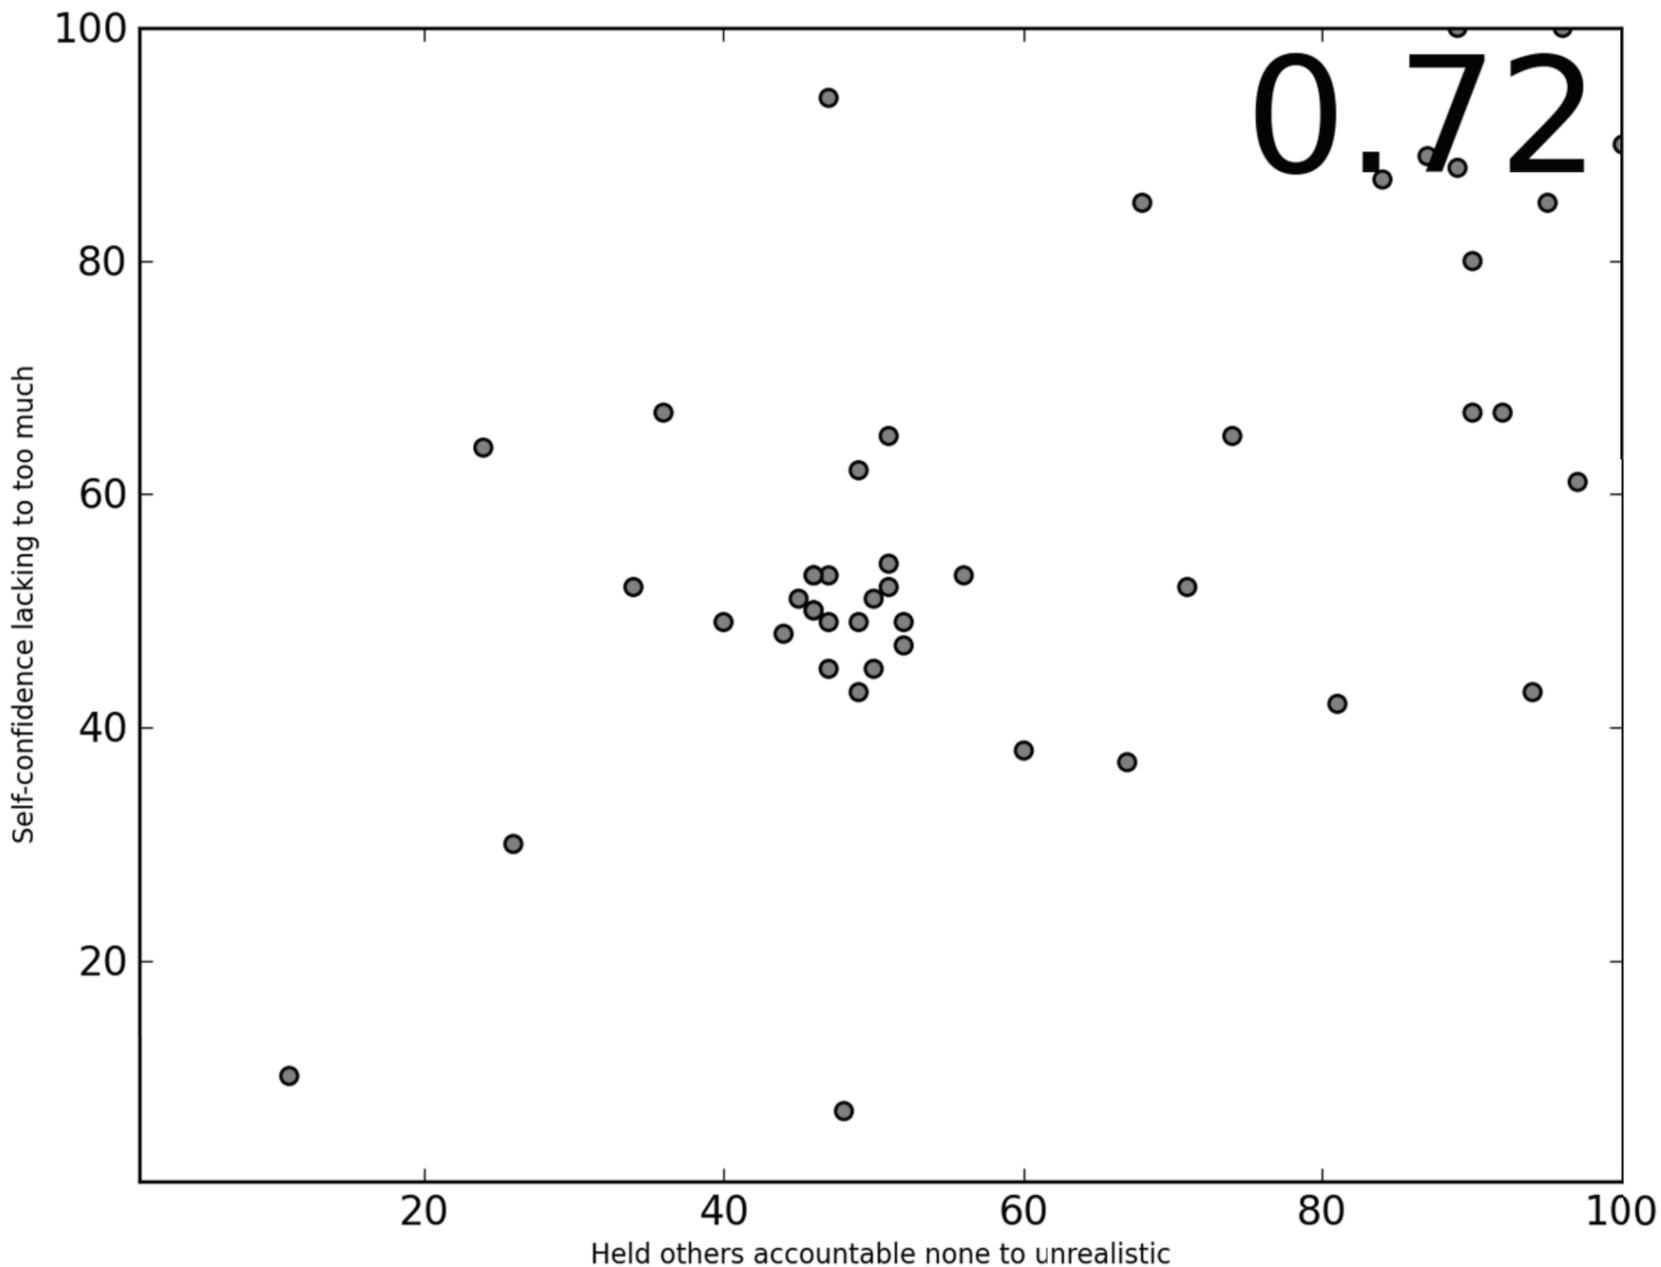

n=55, both axes normal=True, r=0.301, p=0.025

Held others accountable none to unrealistic X Relied on self to others

n=55, both axes normal=True, r=-0.580, p=0.000

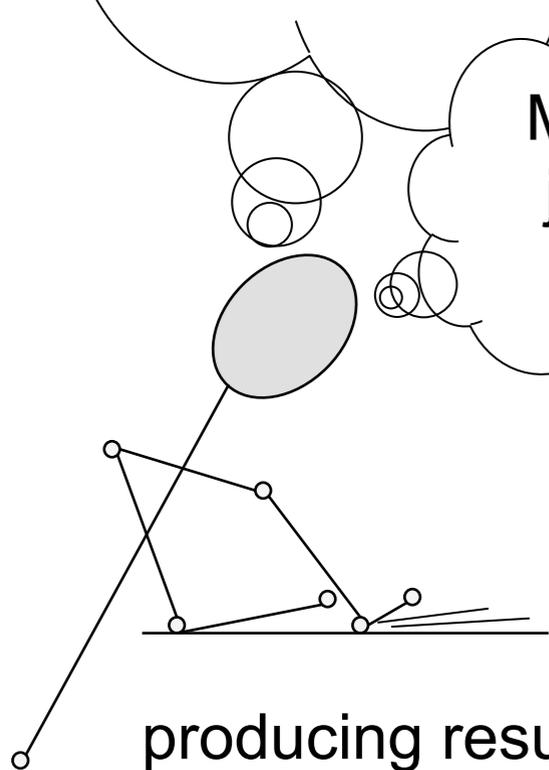

Held others accountable none to unrealistic X Self-confidence lacking to too much

n=49, both axes normal=True, r=0.725, p=0.000

That's an interesting pattern.... WAIT! I'm supposed to be *producing* results, not marking them.

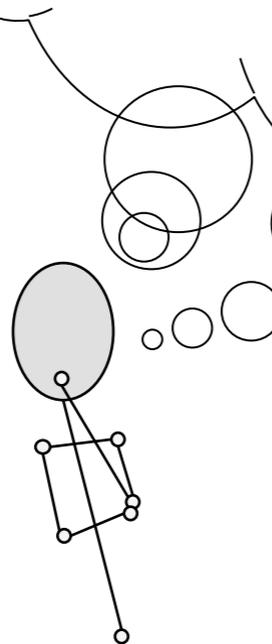

Maybe just a little.

producing results

I wonder if people thought.... WAIT! I'm supposed to be *marking* observations, not interpreting them.

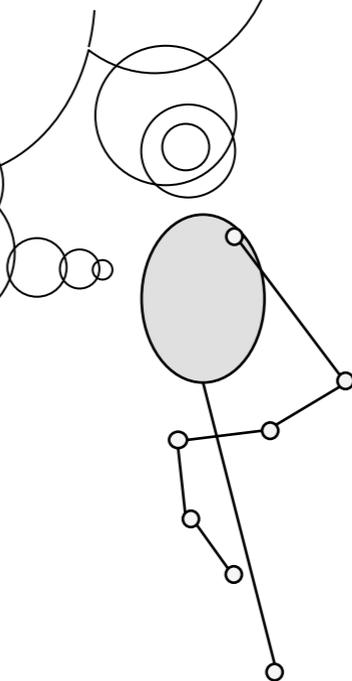

Maybe just a little.

accumulating observations

I'll bet this connects to... WAIT! I'm supposed to be *generating* interpretations, not clustering them.

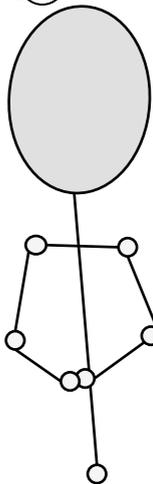

Maybe just a little.

generating interpretations

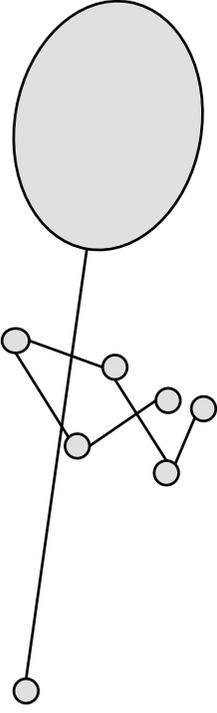

This paragraph would look better if... WAIT! I'm supposed to be *clustering* interpretations, not cleaning up.

Maybe just a little.

Here are the results
of my narrative
analysis.

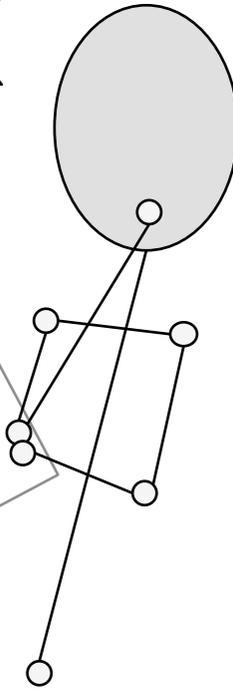

You can't say which of
these interpretations
is correct? You must
be incompetent!

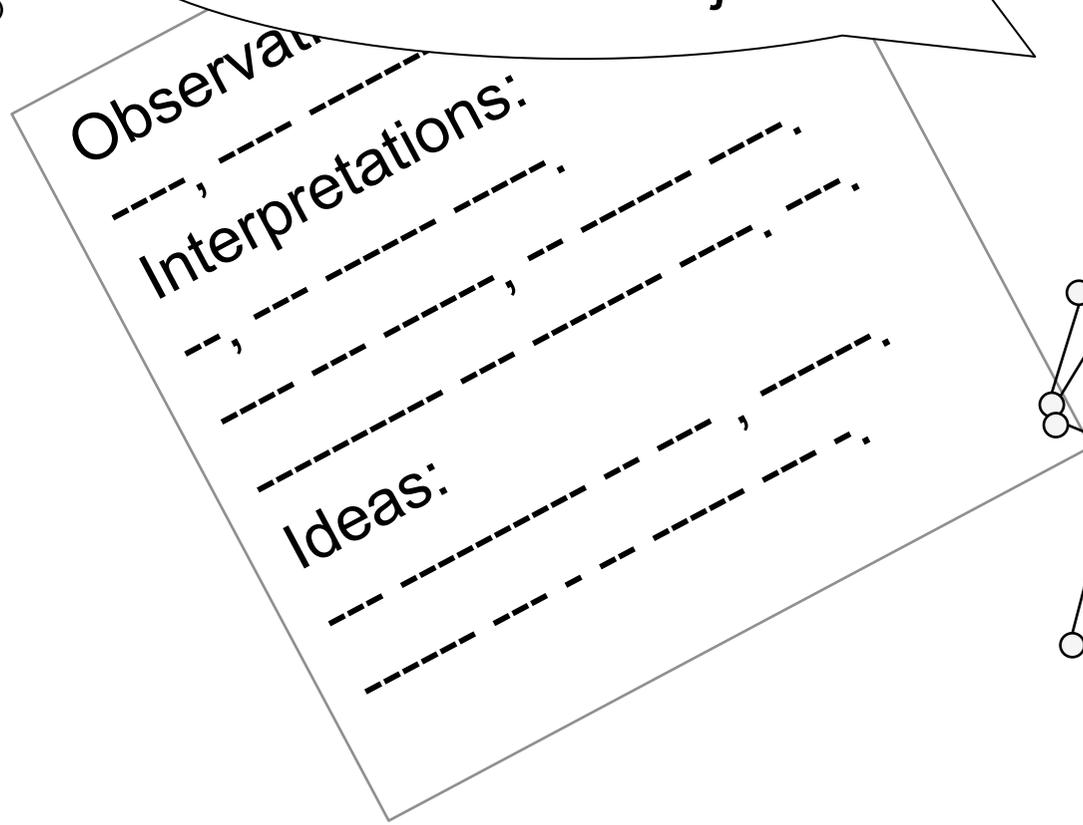

Observation.
-----,
Interpretations:
-----,
Ideas:
-----,

Here are some perspectives
drawn from the stories collected.
Some of the interpretations and
ideas shown here are
deliberately provoking so as to
provide better food for thought.

I see. This is great. We
can use this to think
about the subject.

Observation.
